

Updated December 2021

Small, Underserved, and Disadvantaged Communities (SUDC) Grant Program
Grant Implementation Document

**Water Infrastructure
Improvements for the
Nation Act**

*Safe Drinking Water Act
Section 1459A*

Summary

The Environmental Protection Agency's (EPA) Office of Ground Water and Drinking Water (OGWDW) is issuing an Implementation Document for the **Small, Underserved, and Disadvantaged Communities (SUDC) Grant Program**. EPA will award funding based on an allocation formula. For the purposes of this grant program, the term "state" is used to describe the 50 states and Puerto Rico, Guam, the U.S. Virgin Islands, American Samoa and the Commonwealth of the Northern Mariana Islands.

Eligible activities for assistance include investments necessary for a public water system in a small and disadvantaged community to return to compliance with the Safe Drinking Water Act; efforts that benefit a disadvantaged community on a per household basis; programs to provide household water quality testing, including testing for unregulated contaminants; and activities necessary and appropriate for a state to respond to a contaminant. ***States must fund activities that benefit underserved communities, with consideration for those communities with the greatest needs.***

This document contains the SUDC Grant Program information for both internal and external stakeholders. Nothing in this document is meant to conflict with or supersede Office of Management and Budget Guidance, or EPA's regulations, policy, or any grant terms and conditions. All public materials for the grant program are available at www.epa.gov/safewater/grants.

A separate grant information document for tribal funding will be provided and located at www.epa.gov/safewater/grants.

OVERVIEW

This Small, Underserved, and Disadvantaged Communities (SUDC) Grant Program, CFDA 66.442, Implementation Document describes how the U.S. Environmental Protection Agency (EPA) will administer grant funds to assist underserved, small and disadvantaged communities to improve their drinking water. The purpose of this Implementation Document is to provide states with the information to apply for funding. For the purposes of this document, the term “state” will be used to describe the 50 states, the District of Columbia, Puerto Rico, Guam, the U.S. Virgin Islands, American Samoa and the Commonwealth of the Northern Mariana Islands.

A separate grant information document will be provided for tribal funding and located at www.epa.gov/safewater/grants. State funds can be used to carry out activities that assist public water systems serving tribal populations that also meet the underserved, small and disadvantaged communities criteria, with consideration for those communities with the greatest needs.

II. STATUTORY AUTHORITY

Section 1459A of the Safe Drinking Water Act (SDWA), as amended by the 2016 Water Infrastructure Improvements for the Nation Act and the 2018 America’s Water Infrastructure Act, authorizes EPA to award grants to states to assist underserved, small and disadvantaged communities that are unable to finance activities needed to comply with SDWA, as well as respond to a drinking water contaminant.

As defined in SDWA section 1459A (emphasis added):

“(2) INCLUSIONS.—The term ‘**underserved community**’ includes a political subdivision of a State that either, as determined by the Administrator—

- ‘(A) does not have household drinking water or wastewater services; or
- ‘(B) is served by a public water system that violates, or exceeds, as applicable, a requirement of a national primary drinking water regulation issued under section 1412, including—

- ‘(i) a maximum contaminant level;
- ‘(ii) a treatment technique; and
- ‘(iii) an action level.”¹

The term ‘**small and disadvantaged**’ is specified in the statute as communities:

“(A) that, under affordability criteria established by the State under section 1452(d)(3), is determined by the State—

- ‘(i) to be a disadvantaged community; or

¹ SDWA § 1459A(a)(2) [42 U.S.C. 300j-19a(a)(2)].

(ii) to be a community that may become a disadvantaged community as a result of carrying out a project or activity under subsection (b); or
(B) with a population of less than 10,000 individuals that the Administrator determines does not have the capacity to incur debt sufficient to finance a project or activity under subsection (b).”²

Since states are most familiar with the financial constraints of local communities through their drinking water programs, EPA will defer to states to identify the appropriate small communities that lack the capacity to incur debt and can most benefit from this funding opportunity.

EPA is also authorized to award grants to states for responding to a drinking water contaminant. As delineated in SDWA section 1459A:

“(j) STATE RESPONSE TO CONTAMINANTS.—

(1) IN GENERAL.—The Administrator may, subject to the terms and conditions of this section, issue a grant to a requesting State, on behalf of an underserved community, so the State may assist in, or otherwise carry out, necessary and appropriate activities related to a contaminant—

(A) that is determined by the State to—

(i) be present in, or likely to enter into, a public water system serving, or an underground source of drinking water for, such underserved community; and

(ii) potentially present an imminent and substantial endangerment to the health of persons; and

(B) with respect to which the State determines appropriate authorities have not acted sufficiently to protect the health of such persons.”³

III. ELIGIBLE RECIPIENTS

Funds will be awarded to states (the “eligible entity”) based on an allocation formula (see VI. ALLOCATION OF FUNDS). Eligible applicants include the 50 states, the District of Columbia, Puerto Rico, the U.S. Virgin Islands, Guam, American Samoa, and the Northern Mariana Islands. States will use funding to support public water systems within their jurisdiction. Eligible public water systems include existing privately-owned and publicly-owned community water systems and non-profit non-community water systems, including systems utilizing point of entry or residential central treatment.

² SDWA § 1459A(b)(2) [42 U.S.C. 300j-19a(b)(2)].

³ SDWA § 1459A(j) [42 U.S.C. 300j-19a(j)].

IV. ELIGIBLE ACTIVITIES

Eligible activities under Section 1459A of SDWA⁴ include:

- Investments necessary for a public water system to comply with SDWA
- Efforts that benefit a disadvantaged community on a per household basis according to State affordability criteria
- Programs to provide household water quality testing, including testing for unregulated contaminants
- Activities necessary and appropriate for a state to respond to a contaminant
- The purchase of point-of-entry or point-of-use filters and filtration systems that are certified by a third party using science-based test methods for the removal of contaminants of concern
- Investments necessary for providing accurate and current information about--
 - (i) the need for filtration and filter safety, including proper use and maintenance practices; and
 - (ii) the options for replacing lead service lines (as defined in section 1459B(a)) and removing other sources of lead in water
- Contracts, including contracts with nonprofit organizations that have water system technical expertise, to provide technical assistance

To meet this requirement, grant funding can be used for activities that may include, but are not limited to, the following:

- Treatment
- Transmission and Distribution
- Source
- Storage
- Creation of New Systems
- Consolidation
- Household water quality testing, including for unregulated contaminants
- Providing households access to drinking water services
- Assistance to increase technical, managerial, and financial (TMF) capacity
- Drinking water contamination response efforts

The following lists include examples of activities that could be funded under each category. These lists are not intended to represent all types of activities. If a state wishes to fund an

⁴SDWA § 1459A (42 U.S.C. 300j-19a).

activity not specifically listed, an explanation of how the activity addresses the critical main functions under section 1459A of SDWA must be included in the workplan.

Also note that a wide range of costs and expenditures associated with an infrastructure construction project are eligible as part of a project budget. Costs for restructuring systems that are in significant noncompliance or that lack the technical, managerial and financial capability to ensure compliance are eligible if the restructuring addresses the underlying noncompliance or lack of capability.

Category 1 – Treatment
<i>Example Activities</i>
<ul style="list-style-type: none">• Construction of new treatment facilities or portions of facilities, including:<ul style="list-style-type: none">○ Mixers/Flocculation/Sedimentation○ Filtration○ Chemical addition systems and equipment○ Disinfection○ Filter backwash recycling○ Residuals handling○ On-site generation of disinfectants○ Corrosion control infrastructure• Upgrades, rehabilitation or replacement of facilities or portions of facilities• Raw water storage that is part of the treatment process and located on the property where the treatment facility is located• Point of access or point of use treatment devices (i.e. filters) are only eligible if the device is the compliance treatment technology and the devices are owned and maintained by the public water system

Category 2 – Transmission and Distribution

Example Activities

- Installation, replacement or rehabilitation of infrastructure to improve water pressure to safe levels or to prevent contamination caused by non-potable liquids entering the system through leaks or pipe breaks
 - Transmission mains
 - Distribution mains
 - Meters (e.g., flow meters, customer meters, master meters)
 - Appurtenances (e.g., valves, hydrants, pipe restraints)
 - Pump stations
- Service line replacements, regardless of pipe material and ownership of the property on which the service line is located (service line can be replaced up to premise plumbing)
Note: Partial replacement of lead service lines will not be permitted under this grant program.
- New water main extensions to serve existing residents not served by a safe supply of potable water (this includes installation of the service line up to premise plumbing)

Category 3 – Source

Example Activities

- Development of new sources to replace a contaminated drinking water source or to increase drought resilience
- Raw water intakes, wells or other constructed infrastructure that allows for movement of raw water into the treatment plant or into the distribution system
- Alternative supply in case of emergency or drought, such as:
 - Interconnections
 - Surface water intakes
 - Ground water wells
- Aquifer storage and recovery (ASR) system for water storage (e.g., part of a reclaimed water system), including:
 - Wells
 - Pumps
 - Pipes
 - Wellhead structures
- Riverbank filtration wells
 - Plugging abandoned wells when new replacement wells are drilled

Category 4 – Storage

Example Activities

- New storage or replacement/rehabilitation of existing structures to continue to maintain compliance and protect public health by:
 - Preventing microbiological contaminants from entering a public water system

- Equalizing water demands
- Reducing pressure fluctuations in the distribution system
- Providing reserves when power outages and other emergencies occur
- Providing drought resiliency

Category 5 – Creation of New Systems

Example Activities

- Projects which upon completion will create a community water system to address existing public health problems with serious risks caused by unsafe drinking water provided by individual wells or surface water sources
 - Projects to address existing public health protection problems associated with individual wells or surface water source must be limited in scope to the specific geographic area affected by contamination
- Projects that create a new regional community water system to eliminate individual systems with technical, managerial and financial difficulties

Category 6 – Consolidation

Example Activities

- Purchase of a water system
- Interconnection of systems:
 - to resolve SDWA noncompliance
 - to achieve the technical, managerial and financial capacity needed to prevent noncompliance
 - to reduce the overall per household cost of service
 - for resiliency

Note - Funding from the Grant Program cannot be used to purchase land, easements, rights-of-way, or relocations (prohibited by statute)⁵.

Consolidation activities cannot be for growth purposes. Exceptions will be considered for public water systems in small and disadvantaged communities to consolidate with an existing system that has adequate TMF capacity.

⁵ SDWA § 1459A(g) [42 U.S.C. 300j-19a(g)].

Category 7 – Household water quality testing

Example Activities

- Testing for unregulated contaminants
- Conducting initial, special (non-routine) monitoring to establish a baseline understanding of a contaminant of concern or operation of a newly-used technology
- Testing for potential contamination in water wells or point-of-entry home systems
- Testing and analysis of household water through a compliance lab
- Testing to help identify and improve conditions that may trigger water well pollution

Note – Funding from the Grant Program cannot be used for maintenance and operation purposes (prohibited by statute)⁶ or for routine compliance monitoring and sampling.

Category 8 – Providing households access to drinking water services

Example Activities

- Connection of underserved communities to an existing water system
- Creation of a community water system or regional water system to provide underserved communities access to drinking water services
- Completion of an engineering feasibility study to assess expanding drinking water access to underserved communities
- Collecting water quality data for communities served by private wells to inform plans for connecting to safer drinking water sources
- Technical, Managerial and Financial Assistance to support the establishment of new water systems to serve underserved communities

⁶ SDWA § 1459A(g) [42 U.S.C. 300j-19a(g)].

Category 9 – Technical, Managerial and Financial Assistance

Example Activities

- Training for system staff and board members on the importance of TMF capacity and how to achieve compliance
- On-site visits to systems experiencing compliance challenges
- Water/energy audits
- Completion of an engineering feasibility study to highlight operational areas of improvement
- Operator certification training to qualifying systems
- Completion of environmental reviews
- Preparation of Consumer Confidence Reports
- Developing cost estimates for project planning
- Rate evaluations and project development
- Drafting of source water protection ordinances
- Financial assistance for planning and design of infrastructure improvements
- Asset management
- Identification and inventory of service lines, including lead service lines

Category 10 – Drinking water contamination response efforts

Example Activities

- Investigation of a suspected water contamination incident to determine the extent of contamination
- Planning activities for remediation
- Contaminant characterization, decontamination, and clearance activities to return a public water system to normal operation
- Risk communication / public notification activities
- Post-remediation monitoring to verify removal of a contaminant

V. INELIGIBLE USES OF GRANT FUNDS

Examples of ineligible uses of grant funds are listed below. Please note that this list is intended to be illustrative and is not all inclusive. **It is unallowable to use grant funding for the following activities:**

- Purchase of land, easements, rights-of-way, and relocations (prohibited by statute)⁷
- Operations and maintenance costs (prohibited by statute)⁸
- Partial lead service line replacement

⁷ SDWA § 1459A(g) [42 U.S.C. 300j-19a(g)].

⁸ SDWA § 1459A(g) [42 U.S.C. 300j-19a(g)].

- Replacement of premise plumbing (private side lead service line replacement is eligible)
- Construction or rehabilitation of dams
- Purchase of water rights, unless the water rights are owned by a system to be purchased for consolidation as part of a capacity development strategy
- Construction or rehabilitation of reservoirs, except for finished water reservoirs and those reservoirs that are part of the treatment process and are on the property where the treatment facility is located
- Activities needed primarily for fire protection
- Activities needed primarily to serve future population growth
- Activities that have received assistance from the tribal allotment for Indian Tribes and Alaska Native Villages
- Costs that are unallowable (e.g., lobbying and alcoholic beverages) under [2 CFR 200 Subpart E](#) – Cost Principles.

VI. ALLOCATION OF FUNDS

EPA is providing funding to eligible states and territories for participation in the SUDC Grant Program. If all 50 states, the District of Columbia, and the five qualifying territories participate in the Program, then each will be allocated funds based on an algorithmic formula that includes factors for population below poverty, small water systems, and underserved communities. If fewer than all states and territories participate, the formula will be applied to any remaining unclaimed base funds, and these funds will be reallocated to all participating states and territories. For fiscal year (FY) 2021 funding, EPA is applying a waiver to all grant applicants of the statutory 10 percent cost share due to the financial constraints caused by the COVID-19 pandemic across the country. Waiver of the 10 percent cost share is at the discretion of the Agency.⁹

VII. APPLICATION PACKAGE AND SUBMISSION INFORMATION

This section lists the required documentation and information states must provide EPA to apply. The EPA Regional offices are the primary points of contact to approve grant applications and award funding.

Application Package: The application package must include the following forms:

Mandatory Submissions

- a. **Standard Form (SF) 424**, Application for Federal Assistance
- b. **Standard Form (SF) 424A**, Budget Information for Non-Construction Programs
- c. **Standard Form (SF) 424B**, Assurances for Non-Construction Programs

⁹ SDWA § 1459A(h) [42 U.S.C. 300j-19a(h)].

- d. **EPA Form 5700-54, Key Contacts Form**
- e. **EPA Form 4700-4, Pre-award Compliance Review**
- f. **Project Narrative Attachment Form**

Optional Submissions: **Negotiated indirect cost rate agreement (as applicable)**

Submission Instructions: The EPA Regions will communicate to states the instructions for submitting applications through Grants.gov (www.Grants.gov), including how to access the opportunity. **Funding Opportunity Number: EPA-CEP-02, CFDA#: 66.442.**

VIII. SCOPE OF WORK

States should consider the following parameters when developing their scope of work.

A. Project and Budget Period: It is anticipated that project/ budget periods will be no more than three years.

B. Eligible Activities: States will use funding for eligible activities in underserved, small and disadvantaged communities (see IV. ELIGIBLE ACTIVITIES). The communities benefiting from assistance must meet the statutory definition of being underserved and either small or disadvantaged, with consideration for those communities with the greatest needs (see II. STATUTORY AUTHORITY).

Recognizing that systems may go in and out of compliance over multiple years, a community will be considered as meeting the underserved community definition (B) if the violation / exceedance of the national primary drinking water regulation occurred within the past 5 years. In addition, the underserved community must still meet the small or disadvantaged community criteria according to the statute. As relevant, the underserved community requirement will be validated by EPA staff using the Safe Drinking Water Information System.

C. SUDC List: States will include in their workplan a list (the “SUDC List”) that identifies eligible activities for assistance in their underserved, small and disadvantaged communities. States will work with EPA Regional staff to determine the activities to be funded from their SUDC List, and provide sufficient detail in the workplan as to how that determination was made (see IX. STATE ACTIVITIES SELECTION).

States will include the following details of each activity in their SUDC List: the name of the public water system if applicable, a description of the project or technical, managerial, and financial assistance; the priority assigned to the project; the length of time requested to complete the project; and a description of how the community served meets the underserved, small and disadvantaged communities statutory criteria, with consideration for those communities with the greatest needs.

D. Grant Programmatic Priorities: The principal objective of the program is to facilitate compliance with national primary drinking water regulations or otherwise significantly advance the public health protection objectives of SDWA in small and disadvantaged communities. States are required to use project funds to benefit underserved communities, as defined in section 1459A(a) of SDWA, with consideration for those communities with the greatest needs.

E. Strategic Plan Linkage and Anticipated Outputs/Outcomes

Pursuant to Section 6a of [EPA Order 5700.7, Environmental Results under EPA Assistance Agreements](#), recipients must link proposed assistance agreement workplans with the Agency's Strategic Plan. EPA also requires that workplans adequately describe environmental outputs and outcomes to be achieved under assistance agreements.

Linkage to EPA's Strategic Plan: The activities to be funded support the [EPA's FY 2018-22 Strategic Plan](#). Funding will support Goal 1, "A Cleaner, Healthier Environment," Objective 1.2, "Provide for Clean and Safe Water." Applicants must explain in their workplan how their project will further this objective.

States must include specific statements describing the environmental results of proposed activities in terms of well-defined outputs and, to the maximum extent practicable, well-defined outcomes that will demonstrate how activities will contribute to program priorities.

Outputs: The term "output" means an environmental activity, effort, and/or associated work product related to an environmental goal and objective that will be produced or provided over a period of time or by a specified date. Outputs may be quantitative or qualitative but must be measurable during an assistance agreement funding period.

Expected outputs from the activities to be funded under this announcement may include, but are not limited to, the following:

- Increase in the number of households with drinking water services in underserved, small and disadvantaged communities
- Increase in number of households tested in underserved, small and disadvantaged communities for a drinking water contaminant and identified for action to address contaminant concerns
- Increase in compliance of public water systems in underserved, small and disadvantaged communities with national drinking water regulations
- Increase in number of tools and educational resources provided to support improvements in public water systems' technical, managerial and financial capacity in underserved, small and disadvantaged communities

Outcomes: The term “outcome” means the result, effect or consequence that will occur from carrying out an environmental program or activity that is related to an environmental or programmatic goal or objective. Outcomes may be qualitative and environmental, behavioral, health-related or programmatic in nature, but must also be quantitative. They may not necessarily be achievable within an assistance agreement funding period.

Expected outcomes from the activities to be funded under this announcement may include, but are not limited to, the following:

- Reduction in the number of public water systems out of compliance with health-based standards in underserved, small and disadvantaged communities
- Proactive asset planning and financial management of public water systems in underserved, small and disadvantaged communities to ensure the long-term health and operating success of a water system
- Enhanced technical, managerial, and financial capability of public water systems in underserved, small and disadvantaged communities
- Improved performance of drinking water treatment plants in underserved, small and disadvantaged communities
- Public water systems in underserved, small and disadvantaged communities provide the constituency of the community with safe drinking water
- Improved understanding of emerging threats to water quality, clean drinking water and public health

IX. STATE ACTIVITIES SELECTION

EPA recognizes that there is a wide variation among states and is presenting this process to provide a general outline of the steps to be followed for state submissions.

Each state will submit a draft workplan with their SUDC List to their respective EPA Region. EPA Regions must be able to determine from the draft workplans that activities conform to all applicable requirements of the grant program. EPA Region will work with the state to ensure that the final workplan: (1) includes projects that serve underserved communities, as defined in SDWA 1459A(a) that are small and/or disadvantaged, as defined in SDWA 1459A(b), (2) is designed to help achieve the goals and objectives of the grant program; (3) includes costs that are eligible, reasonable, necessary, allowable and consistent with the grant program; (4) clearly identifies the specific outcomes, outputs, and other results that are linked to funding and includes target dates and milestones for achieving them; (5) meets applicable cost share requirements.

States are strongly encouraged to begin their internal process as early as possible to identify activities for the grant award and to identify multiple potential projects in the event that one or more projects are ineligible. States and EPA Regions are also encouraged, where feasible, to

discuss proposed activities prior to submission of the draft workplan and SUDC List so that the subsequent submission can be reviewed and approved quickly. EPA encourages states to submit draft workplans and SUDC Lists to the EPA Region as soon as possible if they believe that there are difficult issues that may arise (e.g., whether a proposed activity is legally fundable or meets mandatory criteria established by statute).

Prior to beginning the award process, EPA Regions will discuss with each state a schedule to ensure timely award of the grant.

X. COST SHARING REQUIREMENTS

For FY21 funding, EPA is applying a waiver to all grant applicants of the statutory 10 percent cost share due to the financial constraints caused by the COVID-19 pandemic across the country. Waiver of the 10 percent cost share is at the discretion of the Agency. Applicants must provide any land, easements, rights-of-way, and relocations necessary to carry out the project or activity (if relevant) and pay 100 percent of any operation and maintenance costs associated with the project or activity.

XI. AWARD ADMINISTRATION INFORMATION

A. Regulatory Requirements for Grant Assistance Agreements: This award is subject to the regulations of the Uniform Administrative Requirements, Cost Principles and Audit Requirements for Federal Awards; Title 2 CFR, Parts 200 and 1500. A listing and description of EPA's general regulations applicable to the award of assistance agreements may be viewed at: <https://www.epa.gov/grants/policy-regulations-and-guidance-epa-grants>.

B. Terms and Conditions: General administrative and programmatic terms and conditions applicable to EPA's assistance agreements may be viewed at www.epa.gov/grants/grant-terms-and-conditions. EPA Headquarters will provide the EPA Regions with a list of terms and conditions that will also be applicable. EPA Regions will ensure that all applicable terms and conditions are included in the grant agreements.

C. Funding to Subrecipients: Funding may be used to provide subawards of financial assistance provided the recipient complies with applicable requirements for subawards including those contained in 2 CFR Part 200 and EPA's Subaward Policy at <https://www.epa.gov/grants/grants-policy-issuance-gpi-16-01-epa-subaward-policy-epa-assistance-agreement-recipients>. The National Term and Condition for Subawards is available at https://www.epa.gov/sites/production/files/2016-02/documents/gmc_subaward_policy_appendix_b_national_t_and_c.pdf.

D. Funding to Other State Agencies: The EPA's general policy, based on the definitions of the terms "Non-federal entity" ([2 CFR §200.69](https://www.ecfr.gov/current/title-2/chapter-II/part-200/subpart-B/section-200.69)), "Pass-through entity" ([2 CFR §200.74](https://www.ecfr.gov/current/title-2/chapter-II/part-200/subpart-B/section-200.74)) "Recipient" ([2 CFR §200.86](https://www.ecfr.gov/current/title-2/chapter-II/part-200/subpart-B/section-200.86)) and "State" ([2 CFR §200.90](https://www.ecfr.gov/current/title-2/chapter-II/part-200/subpart-B/section-200.90)), is that the state itself is the legal entity that receives

the funds even if one particular component of the state is named in the assistance agreement as the recipient. Transfers of funds between state agencies to perform a particular financial assistance agreement would, therefore, be governed by state law. Additionally, [2 CFR §200.417](#) “Interagency Services” contemplates situations in which one agency provides services to another agency within the same unit of government as a direct cost of performing EPA assistance agreement.

If utilizing interagency service agreements between state agencies under 2 CFR §200.417, the expenditures the state agency makes to carry out the Interagency Service Agreement should be shown in the corresponding direct cost categories (Personnel, Travel, Contractual etc.). If state law characterizes agreements under which one state agency provides services to another state agency as a procurement contract, then the costs would be placed in the contractual category. In interagency service situations, 2 CFR §200.417 provides the state may charge a pro-rated share of indirect costs for the service, or 10% of the “. . .direct salary and wage cost of providing the service (excluding overtime, shift premiums, and fringe benefits) may be used in lieu of determining the actual indirect costs of the service.” Centralized services included in central service cost allocation plans subject to [2 CFR Part 200 Appendix V](#) are accounted for separately.

There may be situations in which state law provides that state agencies or instrumentalities are legally separate for the purposes of financial transactions between them or when state financial management policies for Federal assistance agreements require separate instruments for accounting purposes (e.g. due to differences in indirect cost rates). In those situations, a state may characterize appropriate funding transfers as subawards. Note, however, that if one state agency provides a subaward to another state agency the state agency acting as the pass-through entity must comply with applicable provisions of 2 CFR Part 200 (including [2 CFR §200.331](#)), the National Term and Condition for Subawards, and EPA Subaward Policy unless EPA provides an exception. The aggregate cost estimates for subawards to other state agencies or instrumentalities should be included as line items in the “Other” budget category.

E. Procurements: When procuring property and services under a Federal award, a state must follow the same policies and procedures it uses for procurements from its non-Federal funds. The state will comply with [2 CFR §200.322](#) Procurement of Recovered Materials, and ensure that every purchase order or other contract includes any clauses required by section [2 CFR §200.326](#) Contract provisions. All other non-Federal entities, including subrecipients of a state (other than another state agency), will follow §200.318 General Procurement Standards through §200.326 Contract Provisions.

F. Performance Partnership Grants: Funds awarded under this program are not eligible for inclusion with the state’s Performance Partnership Grants.

G. Expenses Incurred Prior to the Project Period: Except for eligible pre-award costs as defined in [2 CFR §200.458](#) and as authorized by [2 CFR §200.309](#) and [2 CFR §1500.8](#), no funds shall be

used to cover expenses incurred prior to the project/budget period set forth in the assistance agreement. Additionally, except for eligible pre-award costs as defined above, expenses incurred prior to the project/budget period in the assistance agreement are not eligible towards the 10% non-federal cost-share.

H. Quality Assurance/Quality Control: Activities that include the collection of environmental data, such as household water quality testing, will need to comply with the Quality Assurance/Quality Control requirements in [2 CFR 1500.11](#). Environmental data are any measurements or information that describe environmental processes, location, or conditions; ecological or health effects and consequences; or the performance of environmental technology. States should allow sufficient time and resources for this process. EPA can assist states in determining whether QA/QC is required for a proposed project and, if required, the appropriate QA/QC practices needed.

I. Application of Federal Cross-Cutting Authorities (Cross-Cutters): A number of federal laws, executive orders, and government-wide policies apply by their own terms to projects and activities receiving federal financial assistance, regardless of whether the statute authorizing the assistance makes them applicable. All programs, projects, and activities for which a state provides assistance are subject to the following federal anti-discrimination laws: Civil Rights Act of 1964, as amended, 42 U.S.C. 2000d *et seq.*; section 504 of the Rehabilitation Act of 1973, as amended, 29 U.S.C. 794; and the Age Discrimination Act of 1975, as amended, 42 U.S.C. 6102. A state is responsible for ensuring that assistance recipients comply with the requirements of crosscutters, see Appendix D.

J. Environmental Reviews: Consistent with the procedural requirements of the National Environmental Policy Act of 1969 (NEPA), 42 U.S.C. 4321 *et seq.*, as implemented by the Council on Environmental Quality (CEQ) Regulations (40 CFR Parts 1500 through 1508), and EPA's NEPA Regulations (40 CFR Part 6), grant recipients may be required to conduct environmental reviews. Consistent with NEPA's procedural requirements, EPA is including in its decision-making processes procedures to ensure the appropriate and careful consideration of the environmental effects of proposed actions, to analyze potential environmental effects of proposed actions and their alternatives for public understanding and scrutiny, to avoid or minimize adverse effects of proposed actions, and to restore and enhance environmental quality to the extent practicable.

K. Reporting Requirements: Entities receiving assistance will provide quarterly and annual progress reports that adhere to the Performance and Financial Monitoring and Reporting requirements as outlined in the Office of Management and Budget's Uniform Grant Guidance (2 CFR 200). The reporting period (i.e., quarterly, annually) will be identified in the terms and conditions of the assistance agreements. Further, in accordance with [2 CFR §200.328](#), the recipient agrees to report on key project characteristics, milestones, and environmental/public health protection results in the following areas: 1) achievement of the outputs and outcomes

established in the workplan; 2) the reasons for delays if established outputs or outcomes were not met; and 3) any additional pertinent information on environmental/public health results. Information provided in the reports helps monitor the state's progress with implementing their project and also directly supports the Grant Program by highlighting measurable accomplishments to the public and Congress. Final reports shall be submitted within 90 calendar days of the project/budget period end date and summarize accomplishments, expenditures, outcomes, outputs, lessons learned, and any other resources leveraged during the project and how they were used.

Appendix A: Summary of Key Workplan Elements

Section 1. Project Summary and Overall Approach

SUMMARY STATEMENT

A. ACTIVITIES: *[A description of activities to be funded, as described in Section IV. ELIGIBLE ACTIVITIES, including discussion of how the proposed activities are necessary for a public water system to comply with SDWA, and/or provides household water quality testing, and/or is necessary for a state to respond to a contaminant. The activities described in the workplan must fund projects and activities that benefit underserved communities, with consideration for those communities with the greatest needs. This section also includes the 1459A List, as described in Section VIII. SCOPE OF WORK.] Recognizing that systems may go in and out of compliance over multiple years, a community will be considered as meeting the underserved community definition (B) if the violation / exceedance of the national primary drinking water regulation occurred within the past 5 years. In addition, the underserved community must still meet the small or disadvantaged community criteria according to the statute.*

B. ROLES AND RESPONSIBILITIES: *[A discussion of the roles and responsibilities of the state and any other project partners, contractors, or subrecipients.]*

C. TIMELINE AND MILESTONES: *[A timeline for the activities selected for funding, including milestones for specific tasks.]*

Section 2. Programmatic Priorities and Strategic Plan Goals

The activities described in this workplan support the grant Programmatic Priorities and EPA's FY 2018-2022 Strategic Plan Goal 1, "Core Mission: Deliver real results to provide Americans with clean air, land, and water, and ensure chemical safety," Objective 1.2, "Provide for Clean and Safe Water: Ensure waters are clean through improved water infrastructure and, in partnership with states and tribes, sustainably manage programs to support drinking water, aquatic ecosystems, and recreational, economic, and subsistence activities."

Section 3. Environmental Results—Outputs and Outcomes

[This section of the workplan includes a discussion of the outputs and outcomes of the project / activities, as described in Section VIII. SCOPE OF WORK].

Section 4. Budget Narrative

[This section of the workplan is a description of the budget and includes estimated funding amounts for each work component/task. If land, easements, rights-of-way, relocations and operation and maintenance costs associated with the project or activity is to be provided by a named third-party, a letter of commitment will be required.]

Appendix B: Reporting Requirements

Quarterly and Annual performance progress reports are required, including grant fund reporting elements and summaries of the project activity and status of outputs during the reporting period. Quarterly and Annual reports are due 30 days after the end of the reporting period.

Quarterly Reports: The quarterly report will reflect information pertaining to the state and its agency with oversight and the work performed to meet the objectives of the program and the grant activity during the period of performance. Reporting must provide a comprehensive review of the underserved communities receiving assistance; the type of assistance provided / activities performed; and the breakdown of financial and direct grant assistance which subsidized the activities performed during the reporting cycle. Participating states and territories should coordinate with the EPA regional offices on reporting elements after applications have been approved for awards.

Annual Reports: The annual report will reflect the participating entity's comprehensive efforts towards assisting public water systems in underserved communities in meeting the requirements of national primary drinking water regulations and/or expanding access for underserved communities to household drinking water services.

Final Reports: The final report must include: summary of the project or activity, outputs and outcomes achieved, and costs of the project or activity. The final report shall be submitted to EPA within 90 calendar days of the project/budget period end date.

Appendix C: SEC. 1459A. Assistance for Small and Disadvantaged Communities

42 USC 300j-19a: Assistance for small and disadvantaged communities

Text contains those laws in effect on March 6, 2019

SEC. 1459A. ASSISTANCE FOR SMALL AND DISADVANTAGED COMMUNITIES.

(a) **DEFINITION OF UNDERSERVED COMMUNITY.**—In this section:

(1) **IN GENERAL.**—The term ‘underserved community’ means a political subdivision of a State that, as determined by the Administrator, has an inadequate system for obtaining drinking water.

(2) **INCLUSIONS.**—The term ‘underserved community’ includes a political subdivision of a State that either, as determined by the Administrator—

(A) does not have household drinking water or wastewater services; or

(B) is served by a public water system that violates, or exceeds, as applicable, a requirement of a national primary drinking water regulation issued under section 1412, including—

(i) a maximum contaminant level;

(ii) a treatment technique; and

(iii) an action level.

(b) **ESTABLISHMENT.**—

(1) **IN GENERAL.**—The Administrator shall establish a program under which grants are provided to eligible entities for use in carrying out projects and activities the primary purposes of which are to assist public water systems in meeting the requirements of this title.

(2) **INCLUSIONS.**—Projects and activities under paragraph (1) include—

(A) investments necessary for the public water system to comply with the requirements of this title;

(B) assistance that directly and primarily benefits the disadvantaged community on a per-household basis;

(C) programs to provide household water quality testing, including testing for unregulated contaminants;

(D) the purchase of point-of-entry or point-of-use filters and filtration systems that are certified by a third party using science-based test methods for the removal of contaminants of concern;

(E) investments necessary for providing accurate and current information about--

(i) the need for filtration and filter safety, including proper use and maintenance practices; and

(ii) the options for replacing lead service lines (as defined in section 1459B(a)) and removing other sources of lead in water; and

(F) entering into contracts, including contracts with nonprofit organizations that have water system technical expertise, to assist--

(i) an eligible entity; or

(ii) the State of an eligible entity, on behalf of that eligible entity.(c) ELIGIBLE ENTITIES.—An eligible entity under this section—

(1) is—

(A) a public water system;

(B) a water system that is located in an area governed by an Indian Tribe; or

(C) a State, on behalf of an underserved community; and

(2) serves a community—

(A) that, under affordability criteria established by the State under section 1452(d)(3), is determined by the State—

(i) to be a disadvantaged community; or

(ii) to be a community that may become a disadvantaged community as a result of carrying out a project or activity under subsection (b); or

(B) with a population of less than 10,000 individuals that the Administrator determines does not have the capacity to incur debt sufficient to finance a project or activity under subsection (b).

(d) PRIORITY.—In prioritizing projects and activities for implementation under this section, the Administrator shall give priority to projects and activities that benefit underserved communities.

(e) LOCAL PARTICIPATION.—In prioritizing projects and activities for implementation under this section, the Administrator shall consult with and consider the priorities of States, Indian Tribes, and local governments in which communities described in subsection (c)(2) are located.

(f) TECHNICAL, MANAGERIAL, AND FINANCIAL CAPABILITY.—The Administrator may provide assistance to increase the technical, managerial, and financial capability of an eligible entity receiving a grant under this section if the Administrator determines that the eligible entity lacks appropriate technical, managerial, or financial capability and is not receiving such assistance under another Federal program.

(g) COST SHARING.—Before providing a grant to an eligible entity under this section, the Administrator shall enter into a binding agreement with the eligible entity to require the eligible entity—

(1) to pay not less than 10 percent of the total costs of the project or activity, which may include services, materials, supplies, or other in-kind contributions;

(2) to provide any land, easements, rights-of-way, and relocations necessary to carry out the project or activity; and

(3) to pay 100 percent of any operation and maintenance costs associated with the project or activity.

(h) WAIVER.—The Administrator may waive, in whole or in part, the requirement under subsection (g)(1) if the Administrator determines that an eligible entity is unable to pay, or would experience significant financial hardship if required to pay, the non-Federal share.

(i) LIMITATION ON USE OF FUNDS.—Not more than 4 percent of funds made available for grants under this section may be used to pay the administrative costs of the Administrator.

(j) STATE RESPONSE TO CONTAMINANTS.—

(1) IN GENERAL.—The Administrator may, subject to the terms and conditions of this section, issue a grant to a requesting State, on behalf of a community described in subsection (c)(2), so the State may assist in, or otherwise carry out, necessary and appropriate activities related to a contaminant—

(A) that is determined by the State to—

(i) be present in, or likely to enter into, a public water system serving, or an underground source of drinking water for, that; and

(ii) potentially present an imminent and substantial endangerment to the health of persons; and

(B) with respect to which the State determines appropriate authorities have not acted sufficiently to protect the health of such persons.

(2) RECOVERY OF FUNDS.—If, subsequent to the Administrator’s award of a grant to a State under this subsection, any person or entity (including an eligible entity), is found by the Administrator or a court of competent jurisdiction to have caused or contributed to contamination that was detected as a result of testing conducted, or treated, with funds provided under this subsection, and such contamination violated a law administered by the Administrator, such person or entity shall, upon issuance of a final judgment or settlement and the exhaustion of all appellate and administrative remedies—

(A) notify the Administrator in writing not later than 30 days after such issuance of a final judgment or settlement and the exhaustion of all appellate and administrative remedies; and

(B) promptly pay the Administrator an amount equal to the amount of such funds.

(k) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to carry out subsections (a) through (j)—

“(1) \$70,000,000 for fiscal year 2022;

“(2) \$80,000,000 for fiscal year 2023;

“(3) \$100,000,000 for fiscal year 2024;

“(4) \$120,000,000 for fiscal year 2025; and

“(5) \$140,000,000 for fiscal year 2026.
