

# Introducing EPA's Energy Savings and Impacts Scenario Tool (ESIST)

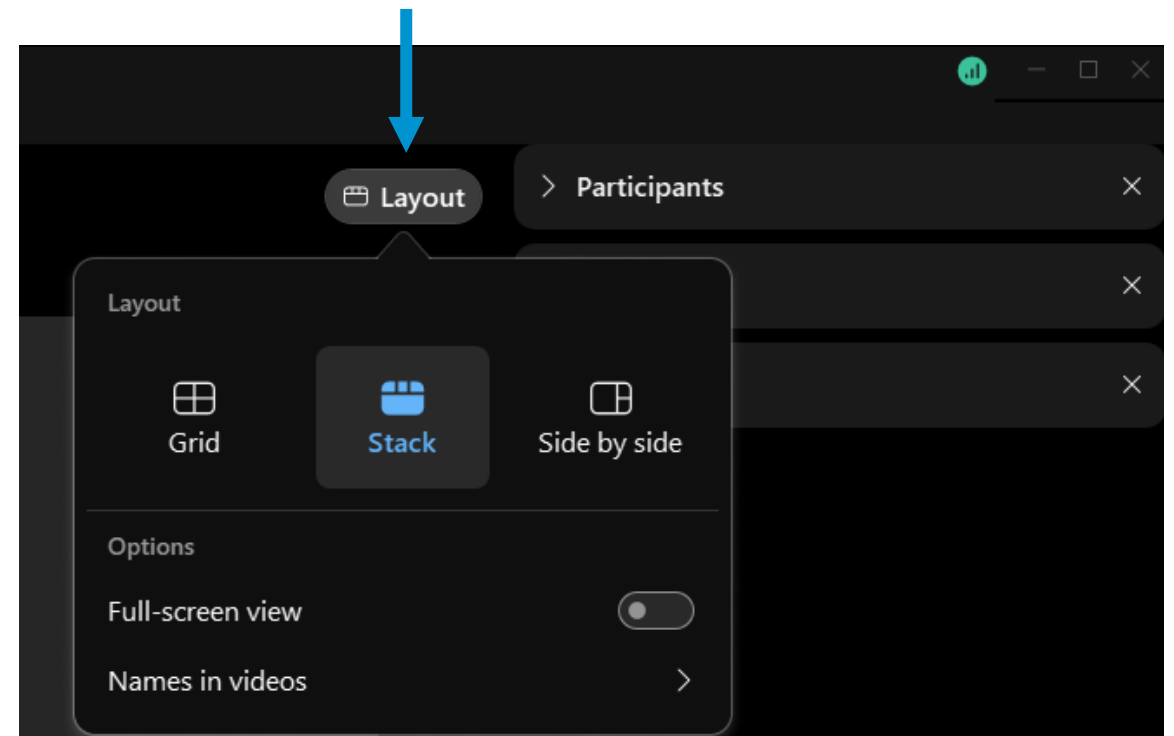

December 8, 2021, 2:00 PM Eastern

Three audio options:

1. Listen via computer
2. Use the "Call Me" feature
3. Dial 1-415-655-0002 or 1-855-797-9485; Event number: 2425 585 1606

# Screen View

- There are several layout options
- Navigate to “Layout” to adjust

# Webinar Panels

We'll use three panels

- Participants, Polling, and Question & Answer (Q&A)
- Use the arrow to expand or collapse the panels

## Adding Panels

- If some panels don't appear, hover over the bottom of the screen and select the desired panels
- Select More Options (...) for additional panels
- Highlighted backgrounds indicate active panels

↑  
Participants

↑  
Q&A

↑  
More Options  
Polling

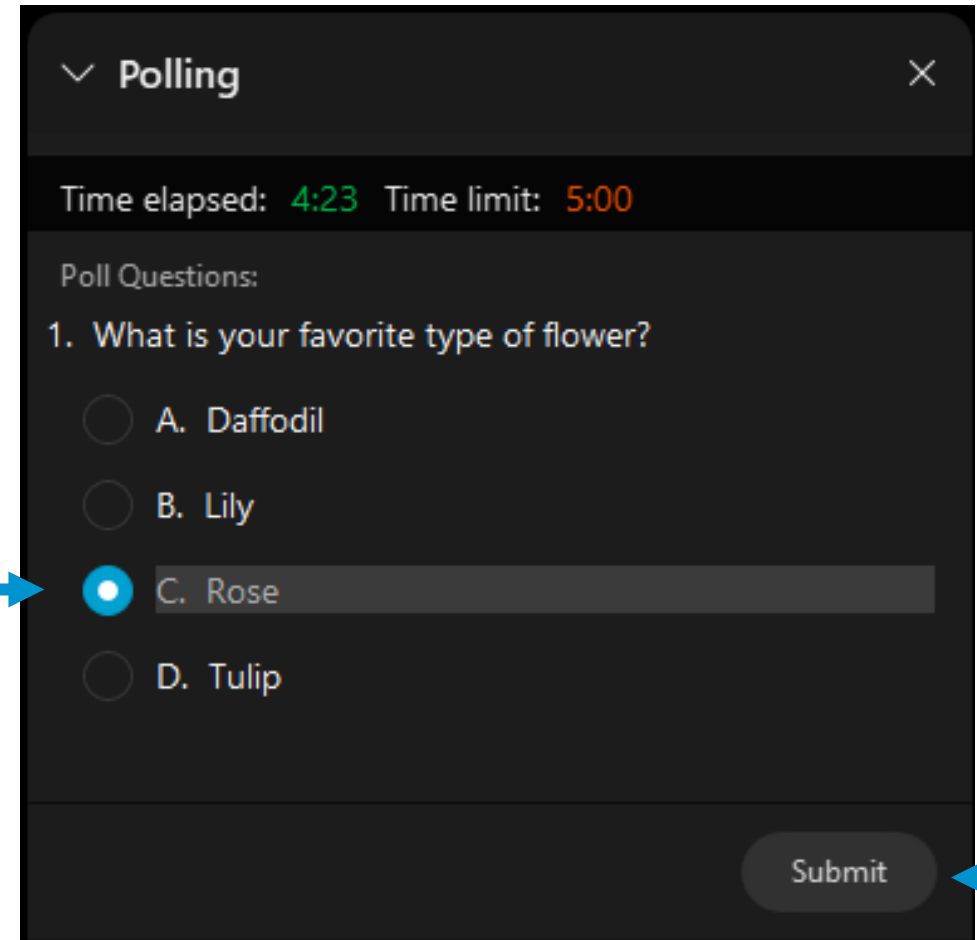

# Polling and Feedback

## Polling

- We'll ask a poll question during the webinar
- The polling panel will appear when we open the first poll
- Select your desired response and hit "Submit"

## Webinar Feedback

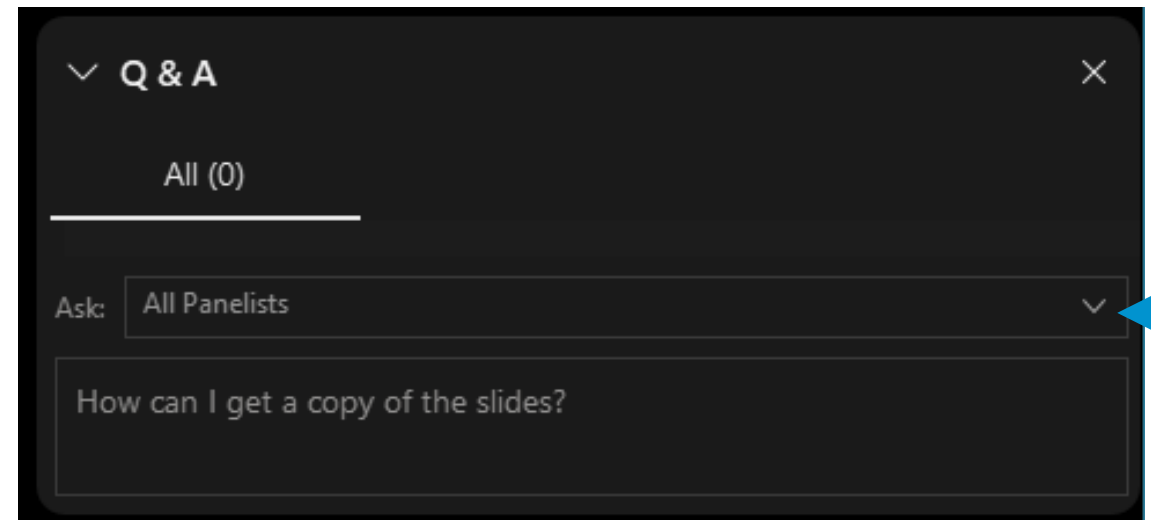

- A feedback form will pop-up when you exit today's webinar

The screenshot shows a dark-themed polling panel. At the top, it says 'Polling' with a dropdown arrow and a close button. Below that, it displays 'Time elapsed: 4:23' and 'Time limit: 5:00'. The main section is titled 'Poll Questions:' and contains the question '1. What is your favorite type of flower?'. There are four radio button options: 'A. Daffodil', 'B. Lily', 'C. Rose', and 'D. Tulip'. The 'C. Rose' option is selected, indicated by a blue dot and a blue arrow pointing to it from the left. At the bottom right of the panel is a 'Submit' button, with a blue arrow pointing to it from the right.

# Q&A

- Participants are muted
- Questions will be moderated at the end
- To ask a question:
  1. Select “All Panelists” from the drop-down menu
  2. Enter your question in the Q&A box
  3. Hit “Enter”

The screenshot shows a dark-themed Q&A interface. At the top, there is a header with a downward arrow, the text 'Q & A', and a close button (X). Below the header, the text 'All (0)' is displayed. A horizontal line separates the header from the main content. The main content area features a label 'Ask:' followed by a dropdown menu currently set to 'All Panelists'. A blue arrow points to the dropdown arrow on the right side of this menu. Below the dropdown is a large text input field containing the question 'How can I get a copy of the slides?'.

# Today's Speakers

- **Maggie Molina**, State and Local Climate and Energy Program, U.S. Environmental Protection Agency (EPA)
- **Cassandra Kubes**, State and Local Climate and Energy Program, U.S. EPA
- **Patrick Knight**, Synapse Energy Economics

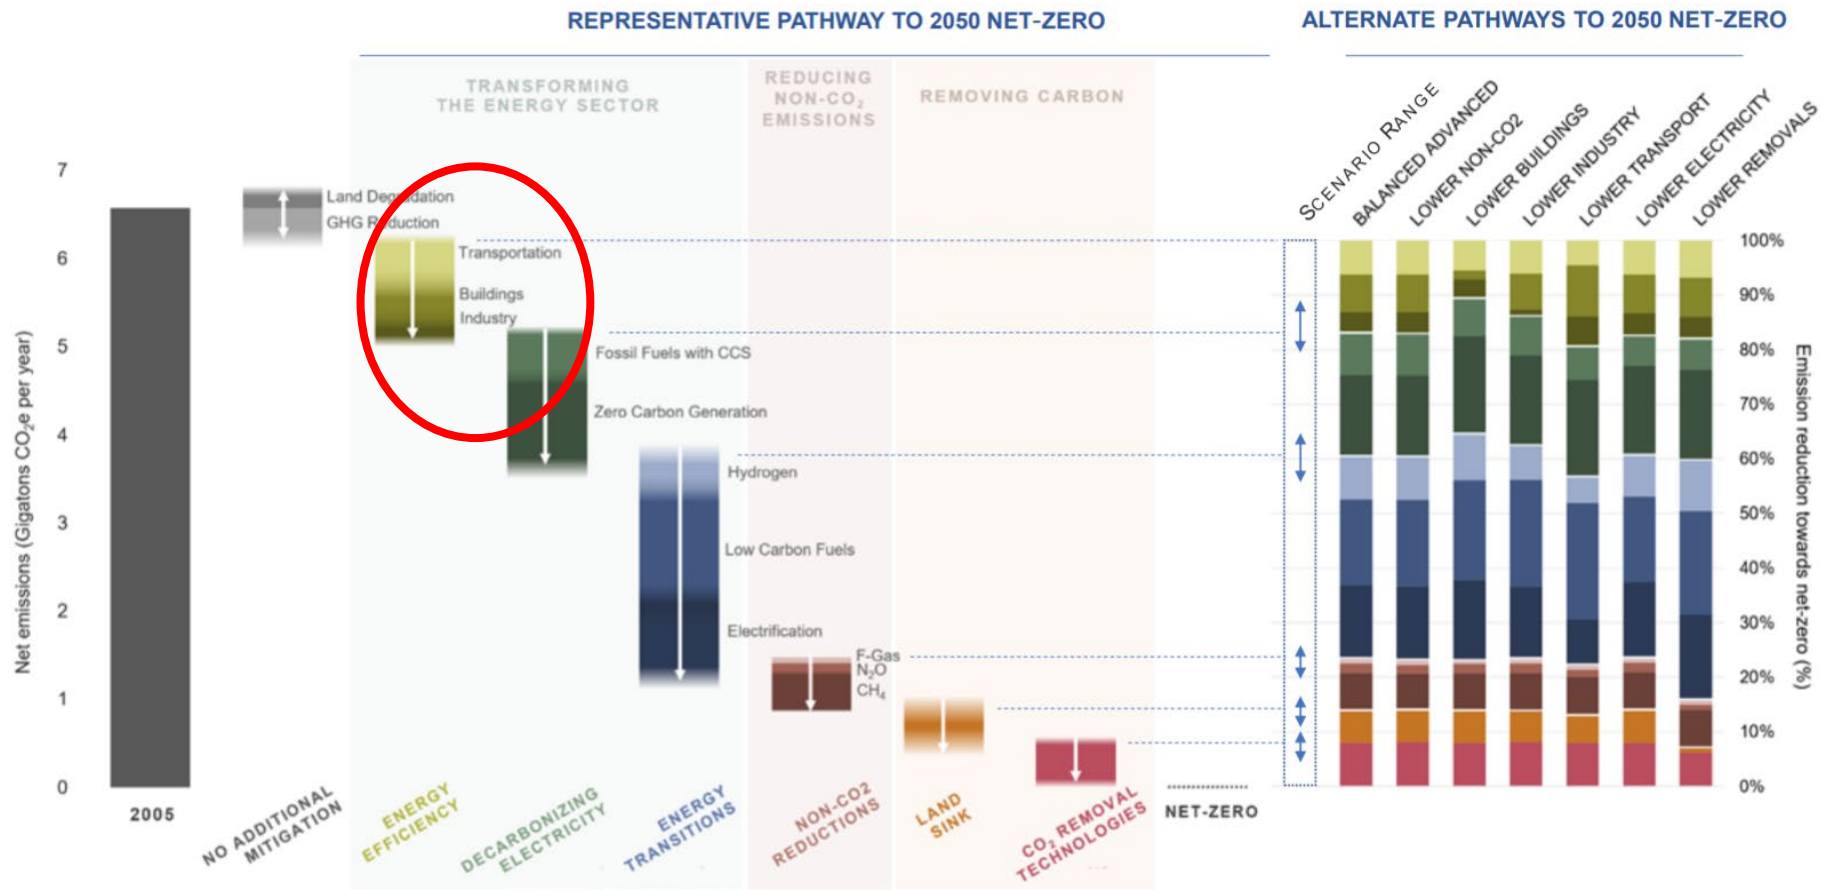

State and Local Climate  
and Energy Program

# Introducing EPA's Energy Savings and Impacts Scenario Tool (ESIST)

# Energy Efficiency (EE) Makes a Critical Contribution Towards Decarbonization

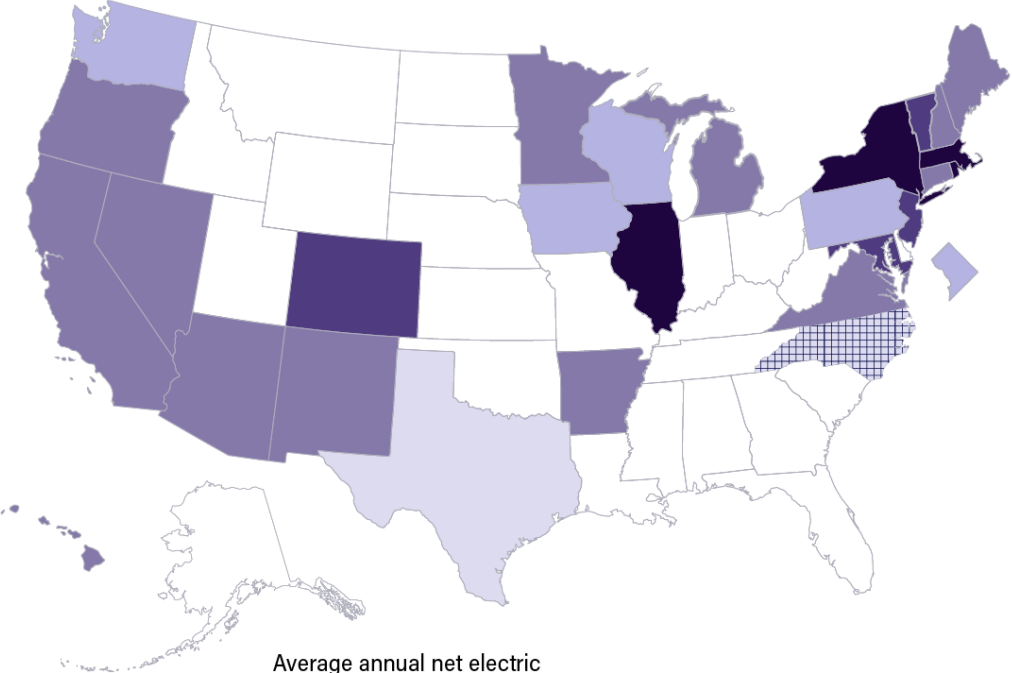

GHG: Greenhouse gas  
 CO<sub>2</sub>: Carbon dioxide  
 F-Gas: Fluorinated gas  
 CCS: Carbon capture and storage  
 N<sub>2</sub>O: Nitrous oxide  
 CH<sub>4</sub>: Methane

Source: United States Department of State and the United States Executive Office of the President (2021)  
 "The Long-Term Strategy of the United States: Pathways to Net-Zero Greenhouse Gas Emissions by 2050."

# Utility Savings Targets are a Key Driver for Energy Efficiency

While about half of states have a savings target policy, all states have some form of utility energy efficiency programs in place.

Average annual net electric savings target (2020-2025)

- ≥ 2%
- 1.5-1.99%
- 1-1.49%
- 0.5-0.99%
- < 0.5%
- ▨ EERS/RPS
- No EERS

Source: American Council for an Energy-Efficient Economy (2021)

EERS: Energy efficiency resource standard  
RPS: Renewable portfolio standard

# Our Tools and Resources Support State, Local and Tribal Stakeholders on Climate and Energy

## Develop Inventories and Set Goals

**GHG INVENTORY TOOLS**

### State Inventory and Projection Tool

Develop and update inventories for 11 sectors. Forecast emissions through 2050

### Local Inventory Tool

Develop community-wide inventories or inventories of local government operations only

### Tribal Inventory Tool

Develop community-wide inventories or inventories of tribal government operations only

## Design, Compare, or Evaluate Policy

### AVoided Emissions and geneRation Tool

Evaluate changes in power plant emissions from energy policy

### Health Benefits per kWh

Estimate the health benefits per kWh of clean energy

### Co-Benefits Risk Assessment Health Impacts Screening and Mapping Tool

Quantify and monetize health impacts of reducing emissions

### Energy Savings and Impacts Scenario Tool

Analyze energy savings, costs, and multiple benefits from energy efficiency programs

## Communicate and Support Policy Implementation

### Greenhouse Gas Equivalencies Calculator

Convert a unit of energy to the equivalent amount of CO<sub>2</sub> emissions from using that amount

### Heat Island Reduction Program

Resources to implement heat island mitigation policies and projects

### Technical Support

Provide 1-1 technical support for state, local and tribal stakeholders

### Convene Stakeholders

Engage state, local and tribal decision-makers

### Local Action Framework:

A Guide to Help Communities Achieve Energy and Environmental Goals

**Energy and Environment Guide to Action:** State Policies and Best Practices for Advancing Energy Efficiency, Renewable Energy, and Combined Heat and Power

**Quantifying the Multiple Benefits of Energy Efficiency and Renewable Energy:** A Guide for State and Local Governments

**Local Government Climate and Energy Strategy Series:** A Guide to Developing and Implementing Greenhouse Gas Reduction Programs

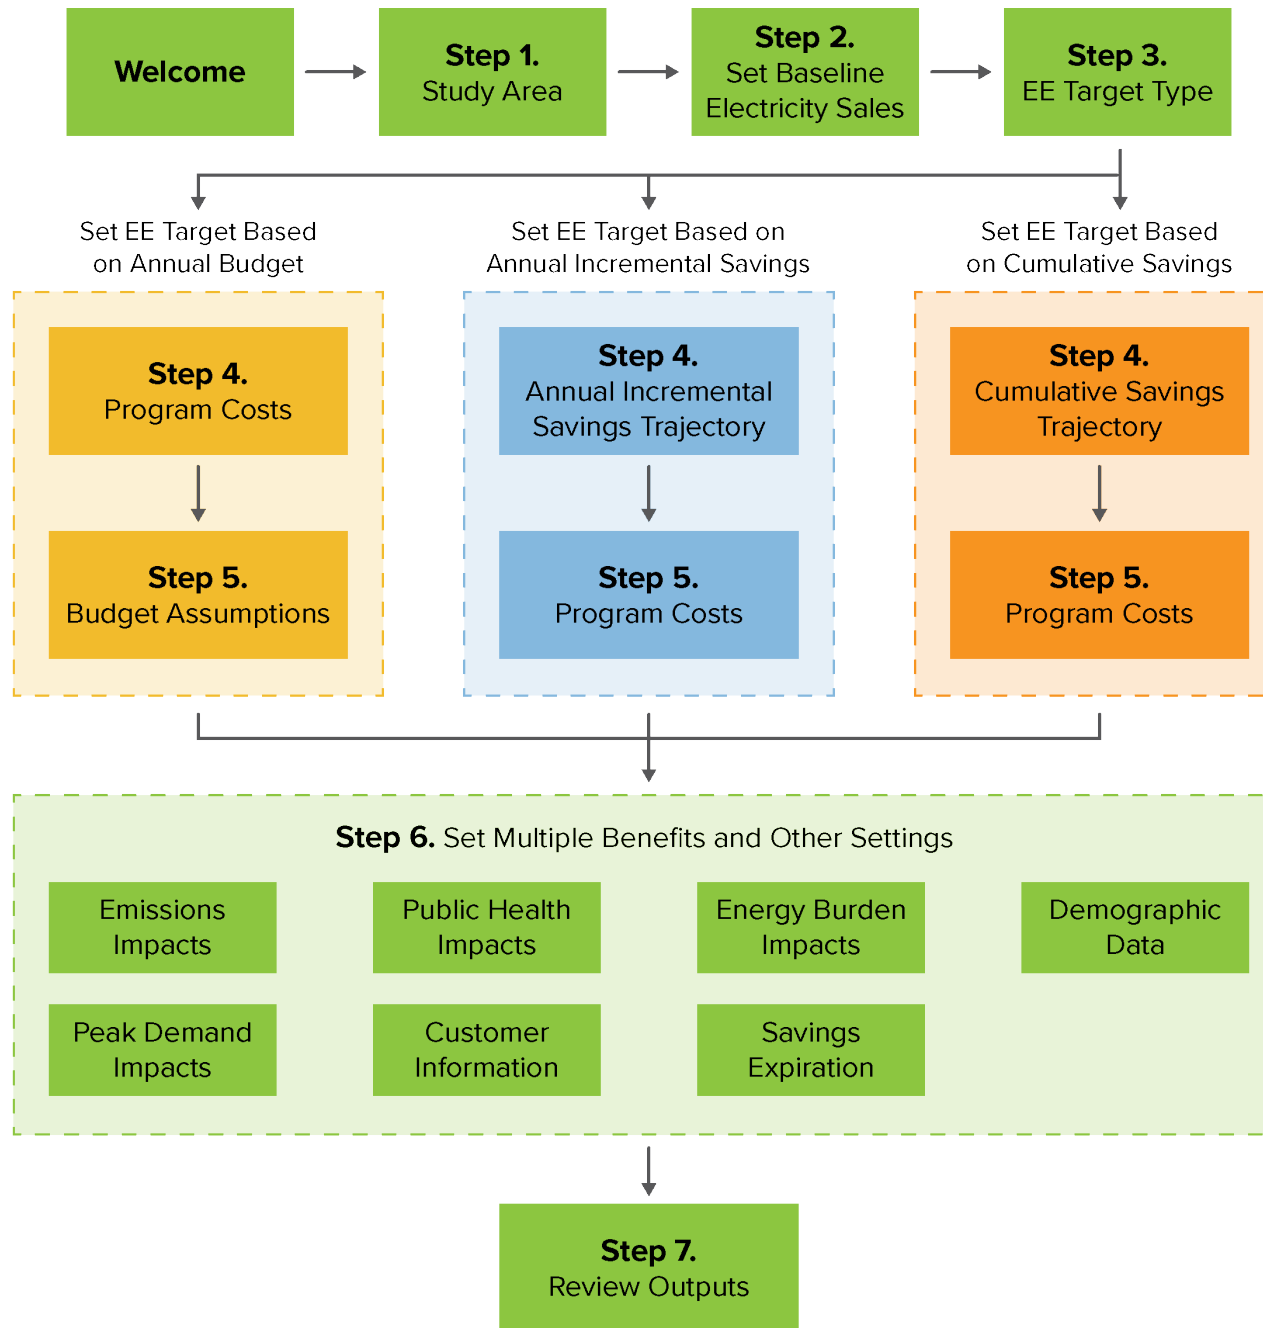

# ESIST Overview

- ESIST is a customizable and transparent Excel-based planning tool for analyzing the energy savings and costs from electric customer-funded energy efficiency programs and their impacts on emissions, public health, and equity.
- Combines several publicly available and peer-reviewed data sets to support analyses that would otherwise be significantly more time-consuming and resource-intensive.
- Provides users with the flexibility to rely on default values or to customize input assumptions.

# ESIST Overview cont.

- ESIST can be used to:
  - Inform energy efficiency planning and decision-making by generating scenarios based on a state, utility, and sector, or assess national-level spanning 2010-2040.
  - Support novice and advanced users in their efforts to design energy efficiency policy goals and increase investments in energy efficiency programs.
  - Estimate a set of multiple benefits from efficiency, including avoided emissions, public health benefits, energy burden impacts, and peak demand impacts.
- ESIST: Pilot Gas Version is a standalone version of the tool to support analyses of natural gas savings.

# ESIST Key Outputs (2010-2040)

Output	Description
Energy savings	Cumulative savings; annual incremental savings; expired savings
Efficiency program costs	First-year costs; levelized cost of saved energy; utility and participant costs
Avoided emissions	CO <sub>2</sub> , fine particulate matter (PM <sub>2.5</sub> ), sulfur dioxide (SO <sub>2</sub> ), and nitrogen oxides (NO <sub>x</sub> ) annual and ozone season
Public health benefits	Benefit-per-ton monetized values for PM <sub>2.5</sub> and ground-level ozone
Energy burden impacts	Target energy burden for low-income households; program spending and participation to reach energy burden reduction
Demographic data	Household data by income, ownership status, race and ethnicity, structure type, primary heating fuel type, household age, housing size, and household language
Peak demand impacts	Cumulative peak savings; system peak demand

# Potential Use Cases

- **State agency officials and public utility commission staff** examining policy implications, including costs and benefits, of changes to efficiency investments.
- **Analysts and academics** exploring different resource planning scenarios with varying levels of energy efficiency investment.
- **Nongovernmental organizations** assessing the energy burden impacts of energy efficiency programs and monetary assistance targeted to reach low-income households.
- **Air quality planners and public health officials** seeking to quantify the emissions and public health benefits of energy efficiency programs.
- **Utilities** reviewing demographic data of households in their utility service territory to reach with energy efficiency programs.

# ESIST Data Sources

- Key data sources in ESIST include:
  - U.S. Energy Information Administration
  - Lawrence Berkeley National Laboratory
  - U.S. Environmental Protection Agency
  - U.S. Department of Energy
  - U.S. Census Bureau's American Community Survey
- ESIST can be used by itself or in tandem with other tools and analyses for further exploration of results.

# Limitations

- ESIST is a scenario planning tool designed to balance complexity and relative ease-of-use.
- Users should be aware of its limitations and appropriate uses and describe these when discussing scenarios and communicating results with stakeholders.
- One important caveat to consider when using ESIST is that it provides annual values on costs and benefits for some but not all categories that are commonly assessed in benefit-cost testing of energy efficiency resources.
- Consult resources such as the National Standard Practice Manual for best practices for benefit-cost analysis of energy efficiency.

# **Tool Demonstration: Getting Started**

# Example Scenario

*Study question: What are the impacts of increasing energy efficiency in Arkansas' residential sector?*

<b>Setting</b>	<b>Input</b>
Geography	Arkansas, all utilities
Sector	Residential
Energy savings target	Achieve annual incremental savings of 2 percent of sales by 2040, starting in 2022 and ramping up by 0.2% annually
Program costs	First-year costs are equal to those observed in most recent historical year

State and Local Climate  
and Energy Program

# Question and Answer Session

## How do you plan to use ESIST (multiple answer)?

- Support design of new policies
- Support design of changes to existing policies
- Estimate multiple benefits of efficiency
- Inform decarbonization planning efforts
- Other (please specify in the Q&A box)

Poll
