U.S. EPA's Incident Waste Decision Support Tool (I-WASTE)

Paul Lemieux | *U.S. Environmental Protection Agency*

EPA's Incident Waste Decision Support Tool (I-WASTE) provides important information to support planning and response decision-making and features calculators to generate waste quantity estimates, provides databases of treatment and disposal facilities, and includes a quick reference to technical information, regulations, and guidance to address the safe and efficient removal, transport, and disposal of waste materials. The objective of I-WASTE is to help reduce restoration time and expense by providing quick access to information that will inform the decision-making process for incident waste management. I-WASTE supports EPA's goals to strengthen resilience to disasters and complements other EPA tools such as the Disaster Debris Recovery Tool and the All-Hazards Waste Management Planning Tool. I-WASTE has recently undergone a significant modernization effort and has been moved to cloud.gov servers to facilitate data exchange with other waste management tools developed by HSRP, OLEM, and the Regional Offices.
