

**United States Environmental Protection Agency Region 9**

**San Francisco Bay Water Quality Improvement Fund  
Request for Applications June 5, 2023**

**Agency Name:** U.S. Environmental Protection Agency Region 9 (EPA)

**Funding Opportunity Name:** San Francisco Bay Water Quality Improvement Fund, Fiscal Year 2023

**Announcement Type:** Request for Applications

**Funding Opportunity Number:** EPA-R9-SFBWQIF-23-02

**Assistance Listing Number:** 66.126

**Important Dates:**

August 30, 2023	Initial applications must be received by EPA via Grants.gov on or before 8:59pm Pacific Time (11:59 pm Eastern Time).
October 11, 2023	Selected applicants notified.
October 27, 2023	Final application packages submitted to EPA.
November 2023	Awards made.

The above dates (other than the August 30, 2023 application deadline date) are anticipated dates and may be subject to change.

**Contact:** Luisa Valiela

Phone: (415) 972-3400

Attachment B GRANTS.GOV SUBMISSION INSTRUCTIONS

## I. Funding Opportunity Description

**A. Background.** Since 2008, EPA has administered the San Francisco Bay Water Quality Improvement Fund (SFBWQIF) competitive grant program to fund projects that protect and restore San Francisco Bay. Such projects must demonstrate environmental results for water quality and aquatic habitat (e.g., wetlands). To date, EPA has awarded over \$71 million and leveraged an additional \$191 million to restore wetlands, improve water quality, and implement green development practices (e.g., employ natural hydrologic processes to treat polluted runoff). Information about past SFBWQIF projects and current funding opportunities can be found on our website (<https://www.epa.gov/sfbaydelta/san-francisco-bay-water-quality-improvement-fund>).

EPA is soliciting applications to improve water quality and restore wetlands in San Francisco Bay and its watersheds. A broad range of entities, as described in Section III.A, are eligible to submit applications under this announcement for projects within the nine Bay Area counties (Marin, Napa, Sonoma, Solano, Contra Costa, Alameda, Santa Clara, San Mateo, and San Francisco.) Applications must fully describe the scope of the project, budget, and environmental results. EPA will use the criteria described in Section V. to evaluate eligible applications.

**B. Program Elements.** Given the historic loss of over ninety percent of San Francisco's baylands and the significant number of waterbodies in the San Francisco Bay region with water quality impairments, the SFBWQIF aims to support a broad array of project types that will protect and restore those wetlands and waters. This year, in addition to long-standing funding priorities such as wetlands restoration, improving stormwater quality, and remediating contaminated shorelines, this solicitation seeks applications that address climate change impacts and environmental justice concerns, as well as those that advance landscape-scale watershed restoration. Examples of eligible and priority project types include, but are not limited to, the following:

- Multi-benefit shoreline projects that restore habitat, provide flood protection and/or reduce pollutants
- Restoration projects that incorporate and implement indigenous knowledge
- Watershed and urban infrastructure improvements in frontline communities
- Beneficial reuse of dredged material
- Solutions that reduce water quality impacts associated with people and communities experiencing homelessness
- Reductions in levels of trash and microplastics in Bay waters
- Restoration of subtidal habitat through sediment remediation and/or debris removal
- Installation of green stormwater infrastructure features to treat stormwater
- Projects to reduce nutrient inputs into San Francisco Bay, (e.g. new or novel wastewater treatment plant technologies, agricultural land BMPs, etc.)

**Scope and Approach:** EPA will evaluate the project design details of applications to ensure they are well-planned and technically sound (see Section V.A.1.). Applications should describe how sea level rise, vulnerability to fires in urban-rural interfaces, changes in rainfall patterns and/or other climate change

stressors are considered in the design and implementation of the projects. Additional consideration will be given to projects that address these concerns in underserved and overburdened communities within San Francisco Bay. EPA intends to fund up to ten quality applications that will benefit underserved communities. This Request for Applications (RFA) for the San Francisco Bay Water Quality Improvement Fund is separate from the Bipartisan Infrastructure Law (BIL) RFA (EPA-I-R9-SFBWQIF-23-01) for the San Francisco Bay Water Quality Improvement Fund, which is currently open and accepting applications. The BIL RFA closes on June 29, 2023.

EPA anticipates awarding the majority of the funding towards efforts that implement projects on-the-ground. Proposals seeking funding for project planning and assessment will be considered; however, such proposals should provide a commitment to future implementation, including any known hurdles to implementation. Implementation projects should be based on existing plans, such as a restoration plan, a Total Maximum Daily Load Implementation Plan, a watershed plan or a stormwater/green infrastructure plan. All project proposals must be consistent with the San Francisco Estuary Partnership's (SFEP) Comprehensive Conservation and Management Plan (CCMP) and must indicate the CCMP objective(s) and action(s) to be implemented under the project. Attachment A identifies a list of the CCMP objectives and actions that address program priorities and should be used as a basis to provide this information in the proposal narrative. For additional information on the CCMP refer to the website link in Section VIII.C.

Environmental Results: Applicants must describe how their projects will achieve measurable water quality and/or aquatic habitat improvement, quantitatively define the project's environmental results (also known as outcomes) and provide timeframes for achieving those results (see Section I.C.3. "Environmental Outputs and Outcomes" and Section V.A.2.).

All projects that include a monitoring component should be compatible with the California Surface Water Ambient Monitoring Program (SWAMP), the California Wetland and Riparian Area Monitoring Program, the California EcoAtlas and/or the San Francisco Bay Regional Monitoring Program (RMP) (see links in Section VIII.C.).

Partnerships and Community Engagement: Applicants will need to describe partnerships that will contribute to project success (see Sections V.A.6a. and V.A.6b.). Emphasis on the diversity of organizational support and partnerships (e.g., environmental, business, community-based and social service organizations) and on historically underserved communities (i.e., economically disadvantaged or other populations with disproportionate exposure to environmental harm) are important considerations for applications. A project that benefits an underserved community could, for example, include implementation of green infrastructure to improve water quality and reduce a community's vulnerability to flooding from aging infrastructure.

Please note that for evaluation criterion number 6. in Section V. A., points will be awarded for addressing partnerships **or** underserved communities, but not both. Applicants who choose to address the underserved community criteria should refer to the map on page 5 (Figure 1) to ensure their project is located within an underserved community that will directly benefit from the project. For purposes of this competition and the evaluation of applications, "underserved communities" means populations sharing a particular characteristic, as well as geographic communities, that have been systematically denied a full

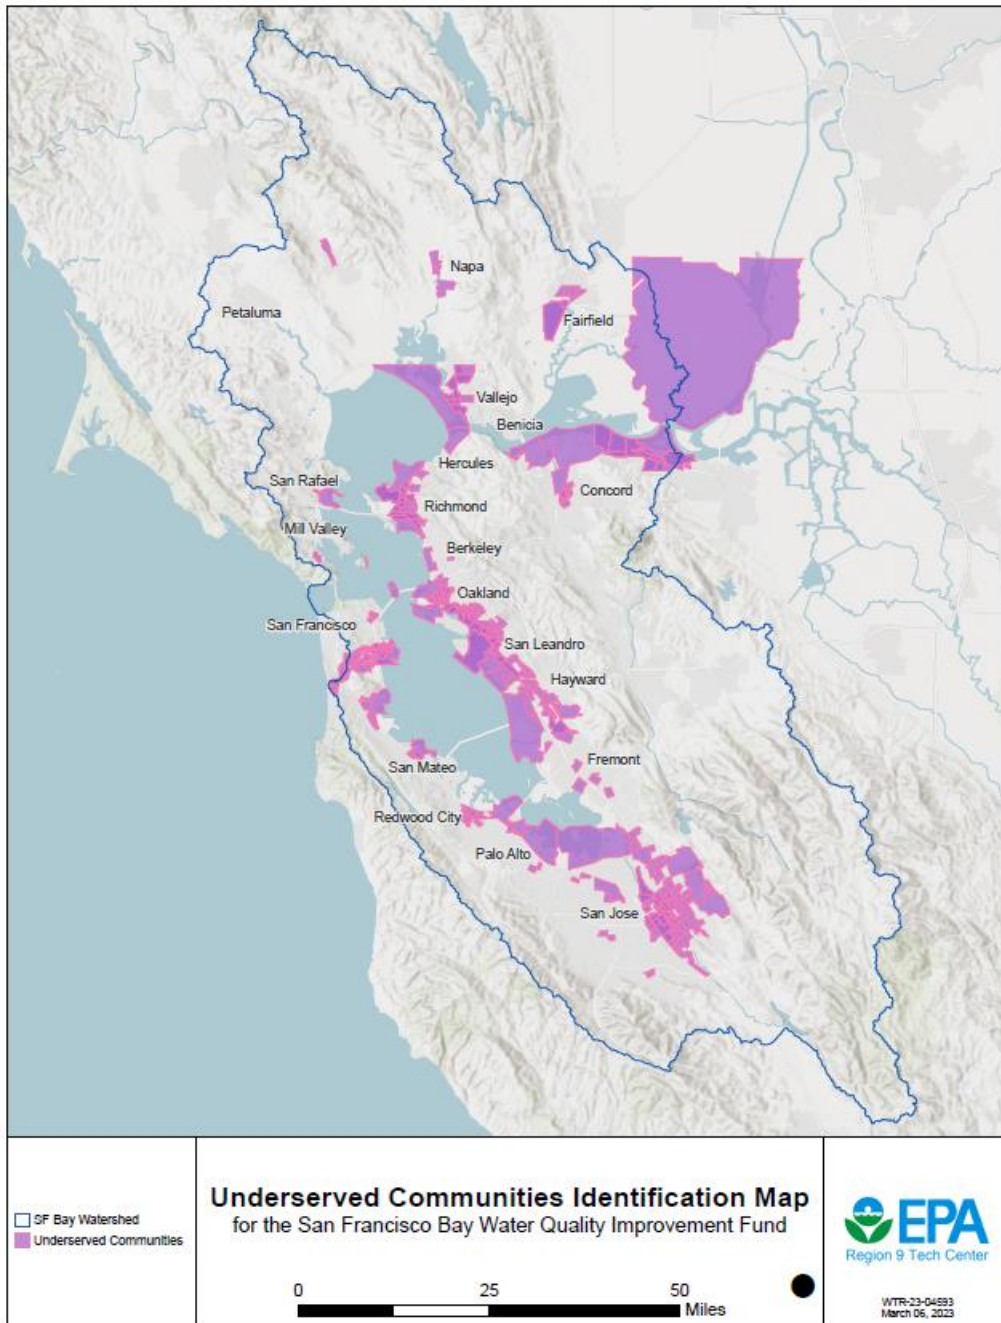

opportunity to participate in aspects of economic, social, and civic life, as defined in the Biden Administration's Executive Order 13985: Advancing Racial Equity and Support for Underserved Communities and consistent with the Biden Administration's Executive Order 14008 on environmental justice and climate change. The SFBWQIF underserved community map (Figure 1) identifies areas with underserved communities that have been adversely and disproportionately affected by multiple sources of pollution.

The map's highlighted areas in pink and purple show census tracts from three different data sources. The first source includes areas that have been designated as "disadvantaged communities" by CalEPA for the purpose of SB 535. This source is the state of California's CalEnviroScreen mapping tool, which uses community health data including asthma, low birth weights, and cardiovascular disease to identify disadvantaged communities. The second source designates "disadvantaged communities" by the Council on Environmental Quality for the Climate and Economic Justice Screening Tool (CEJST). This source consists of data utilizing threshold burdens and associated socioeconomic thresholds, including airborne particulate matter, proximity to hazardous waste facilities, linguistic isolation, and many others to identify disadvantaged communities. The third source identifies "underserved communities" using EPA's Environmental Justice Screening Tool, EJScreen.

**NOTE:** In the past, many Federal agencies used the term "disadvantaged communities." This term has largely been replaced by "underserved communities" and also the descriptor "vulnerable communities." To the extent possible, this RFA will use the term "underserved communities."

Applicants should carefully review these program elements and the evaluation criteria to inform project scoping and develop a competitive application.

**FIGURE 1: Underserved Communities Identification Map**

**C. Environmental Results and Linkage to Strategic Plan.**

1. Pursuant to Section 6.a. of EPA Order 5700.7A1, “*Environmental Results under EPA Assistance Agreements,*” Applicants must link proposed assistance agreements to the EPA

Strategic Plan (see below). EPA also requires that applicants and recipients adequately describe environmental outputs and outcomes to be achieved under assistance agreements.

2. *Linkage to EPA Strategic Plan.* The activities to be funded under this solicitation support EPA's [FY 2022-2026 Strategic Plan](#). Awards made under this solicitation will support Goal 1 (Tackle the Climate Crisis, and Objective 1.2 Accelerate Resilience and Adaptation to Climate Change Impacts), Goal 2 (Take Decisive Action to Advance Environmental Justice and Civil Rights, and Objective 2.1 Promote environmental justice and civil rights at the federal, tribal, state and local levels), and/or Goal 5 (Ensure Clean and Safe Water for All Communities, and Objective 5.2 Protect and restore waterbodies and watersheds).

3. **Environmental Outputs and Outcomes.** EPA will consider the significance of expected environmental outputs and outcomes during the selection process (See Sections IV. and V.)

a. **Outputs.** The term “output” means an activity, effort, and/or work product that will be produced or provided over a specific period of time or by a specific date. Outputs (or project deliverables) may be quantitative or qualitative but must be measurable during an assistance agreement funding period. Proposals must include a description of project outputs and the way in which recipients will track project milestones throughout the grant period. For some projects, this may include monitoring and the production of a Quality Assurance Project Plan (QAPP). Examples of project output include, but are not limited to, number of presentations made, number of participants at an event, and draft and final reports produced. EPA requires progress reports and a final report as specified in Section VI.C. “Reporting Requirements” to report on outputs.

b. **Outcomes.** The term “outcome” means an environmental result, effect or consequence that will occur from carrying out project activities and/or completing outputs related to an environmental goal. Outcomes may be environmental, behavioral, health-related, or programmatic in nature, but must be quantitative. Proposals must include a description of project outcomes even if the outcome to be achieved is beyond the assistance agreement funding period. For projects that are implementing activities called for in a plan such as a Total Maximum Daily Load (TMDL) or a restoration plan with an extended timeframe (e.g., 20 years), applicants should explain the degree to which the activities move towards the stated long-term goal or outcome. Outcomes expected as a result of the awards under this announcement may include, but are not limited to, the following:

- Acres of wetlands/other aquatic habitat restored
- Acres restored using indigenous knowledge
- Pollutant load reductions, attainment of water quality objectives, or other numeric indicators of water quality improvement
- Percentage of land area where Low Impact Development has been or will be implemented to achieve water quality improvements and/or other habitat enhancements

Additional information regarding EPA's definition of environmental results in terms of "outputs" and

"outcomes" can be found at:

[https://www.epa.gov/sites/production/files/201503/documents/epa\\_order\\_5700\\_7a1.pdf](https://www.epa.gov/sites/production/files/201503/documents/epa_order_5700_7a1.pdf) and <https://www.epa.gov/sfbay-delta/applicationassistance#results>.

**D. Statutory Authority.** Congress appropriated funds for this grant program under the “Consolidated Appropriations Act, 2023” (Public Law 117-328). EPA will award such funds under Section 320 of the Clean Water Act (National Estuary Program), 33 U.S.C. §1330.

**E. Additional Provisions.** Additional provisions that apply to sections III., IV., V., and VI. of this solicitation and/or awards made under this solicitation, can be found at [EPA Solicitation Clauses](#). These provisions are important for applying to this solicitation and applicants need to review them when preparing applications for this solicitation. If you are unable to access these provisions electronically at the website above, please contact the EPA point of contact listed in Section VII. of this solicitation to obtain the provisions.

## **II. Award Information**

**A. Available Funding.** The total amount anticipated to be awarded under this announcement is approximately \$30 million of fiscal year 2023 funds under the authority of Section 320 of the Clean Water Act, 33 U.S.C. § 1330. Awards will range from approximately \$1,000,000 to \$3,000,000 to be budgeted over a typical project period of four years. EPA anticipates awarding 20 to 25 grants or cooperative agreements under this solicitation.

EPA also reserves the right to make additional awards under this announcement, consistent with Agency policy and guidance, if additional funding (e.g., FY 2024) becomes available after the original selection decisions. Any additional selections for awards will be made no later than six months after the original selection decisions.

EPA intends to fund up to 10 quality applications that will benefit underserved communities, as defined in Section I.

Funding for the projects is not guaranteed and is subject to the availability of funds, the evaluation of applications based on the criteria in this announcement, and other applicable considerations. In addition, EPA reserves the right to make no awards, or fewer awards than expected, under this announcement. Further, award of funding through this competition is not a guarantee of future funding.

**B. Project Period for Awards.** EPA anticipates making awards resulting from this solicitation in November 2023. Previously funded projects have typically had project periods of 4 years.

**C. Partial Funding.** In appropriate circumstances, EPA reserves the right to partially fund applications by funding discrete portions or phases of proposed projects. If EPA decides to partially fund an application, it will do so in a manner that does not prejudice any applicants or affect the basis upon which the application, or portion thereof, was evaluated and selected

for award, and therefore maintains the integrity of the competition and selection process.

**D. Funding Type.** Successful applicant(s) will be issued a grant or cooperative agreement as appropriate. If EPA awards a grant agreement, it will provide oversight and monitoring, but EPA will not be substantially involved in the recipient's project. A cooperative agreement is an assistance agreement that is used when there is substantial federal involvement with the recipient during the performance of an activity or project. EPA awards cooperative agreements for those projects in which it expects to have substantial interaction with the recipient throughout the recipient's performance of the project. EPA will negotiate the precise terms and conditions of "substantial involvement" as part of the award process. Federal involvement may include close monitoring of the recipient's performance; collaboration during the performance of the scope of work; in accordance with 2 CFR 200.317 and 2 CFR 200.318, as appropriate, review of proposed procurements, reviewing qualifications of key personnel; and/or review and comment on the content of printed or electronic publications prepared. EPA does not have the authority to select employees or contractors employed by the recipient. The final decision on the content of reports rests with the recipient.

### **III. Eligibility Information**

**Note: Additional provisions that apply to this section can be found at [EPA Solicitation Clauses](#).**

**A. Eligible Applicants.** The following entities are eligible to apply for funding under this announcement: State, local government agencies, districts, and councils; regional water pollution control agencies and entities; State coastal zone management agencies; Federally and non-federally recognized tribes; public and private universities and colleges, public or private non-governmental, non-profit institutions are eligible to apply, unless restricted by the authorizing statutes.

Consistent with the definition of Nonprofit organization at 2 CFR § 200.1, the term nonprofit organization means any corporation, trust, association, cooperative, or other organization that is operated mainly for scientific, educational, service, charitable, or similar purpose in the public interest and is not organized primarily for profit; and uses net proceeds to maintain, improve, or expand the operation of the organization. The term includes tax-exempt nonprofit neighborhood and labor organizations. While 2 CFR § 200.1 excludes Institutions of Higher Education from the definition of non-profit organization, public or nonprofit Institutions of Higher Education are, nevertheless, eligible to submit applications under this RFA. Non-profit organizations must have documentation of non-profit status from the U.S. Internal Revenue Service or their state of incorporation, except that non-profit organizations as defined in Section 501(c)(4) of the Internal Revenue Code that engage in lobbying as defined in Section 3 of the Lobbying Disclosure Act of 1995, 2 U.S.C. § 1611, or superseding legislation are ineligible.

**B. Cost Sharing/Match Requirement.** Matching funds of 50% of the total project cost are required under this competition based on the requirements of Section 320 of the CWA, 33 U.S.C. §1330. Accordingly, EPA is requiring applicants to identify the non-federal match of 50% on Standard Form 424A. A 50% match means EPA will fund a maximum of 50% of the total project cost. Matching funds can come in the form of cash and in-kind contributions, such as the use of volunteers and/or donated time, equipment, etc., consistent with the regulations governing matching fund requirements (2 CFR 200.306) from your own organization and/or your project

partners. Federal funds may not be used to meet the match requirement for this grant program unless authorized by the statute governing their use.

**C. Threshold Eligibility Criteria.** These are requirements which if not met by the time of application deadline date will result in elimination of the application from further consideration for funding. All applications will be reviewed for eligibility and must meet the eligibility requirements described in Sections III.A., B., and C. to be considered eligible. Only applications that meet **all of these criteria** will be evaluated using the evaluation criteria under Section V. Applicants deemed ineligible for funding as a result of the threshold eligibility review will be notified within 15 calendar days of the ineligibility determination.

- 1. Applicant Eligibility:** Applicants must meet the applicant eligibility requirements described in Section III. A.
- 2. Program Relevance:** Proposals must demonstrate that the project(s) improves water quality and/or restores wetlands in San Francisco Bay and its watersheds.
- 3. EPA Strategic Plan:** Applications must support Strategic Plan Goal 1, Goal 2 and/or Goal 5 of EPA's Strategic Plan as specified in Section I.C.2.
- 4. Fifty (50) % Match:** Proposals must demonstrate how applicants will provide a 50% match of the total project cost as described in Section III. B.
- 5. CCMP Consistency:** Proposals must describe how the proposed activities are consistent with SFEP's CCMP (see Attachment A) and identify relevant CCMP objective(s) and action(s) to be implemented by the project.
- 6. Substantial Compliance:** All applications will be reviewed for eligibility and must meet the eligibility requirements described in Sections III.A., B., and C. to be considered eligible. Applicants deemed ineligible for funding consideration as a result of the threshold eligibility review will be notified within 15 calendar days of the ineligibility determination. Applications must substantially comply with the application submission instructions and requirements set forth in Section IV. of this solicitation or else they will be rejected. However, where a page limit is expressed in Section IV. with respect to the application, or parts thereof, pages in excess of the page limitation will not be reviewed. Applicants are advised that readability is of paramount importance and should take precedence in application format, including selecting a legible font type and size for use in the application.
- 7. Application Submission:** In addition, initial applications must be submitted through Grants.gov as stated in Section IV of this solicitation (except in the limited circumstances where another mode of submission is specifically allowed for as explained in Section IV.) on or before the application submission deadline published in Section IV of this solicitation. Applicants are responsible for following the submission instructions in Section IV. of this solicitation to ensure that their application is timely submitted. Please note that applicants experiencing technical issues with submitting through Grants.gov should follow the instructions provided in Section IV., which include both the requirement to contact Grants.gov and email a full application to EPA prior to the deadline.
- 8.** Applications submitted outside of Grants.gov will be deemed ineligible without further consideration unless the applicant can clearly demonstrate that it was due to EPA

mishandling or technical problems associated with Grants.gov or SAM.gov (See Attachment B). An applicant's failure to timely submit their application through Grants.gov because they did not timely or properly register in SAM.gov or Grants.gov will not be considered an acceptable reason to consider a submission outside of Grants.gov.

**9. Project Location:** Projects must occur entirely within one or more of the nine Bay Area counties (Marin, Napa, Sonoma, Solano, Contra Costa, Alameda, Santa Clara, San Mateo, and San Francisco) that drain to San Francisco Bay.

**10. Ineligible Activities:** If an application is submitted that includes any ineligible tasks or activities, that portion of the application will be ineligible for funding and may, depending on the extent to which it affects the application, render the entire application ineligible for funding. See <https://www.epa.gov/sfbay-delta/rfa-application-assistance-frequently-asked-questions> for information in the Frequently Asked Questions related to ineligible activities.

#### **IV. Application and Submission Information**

**Note:** Additional provisions that apply to this section can be found at [EPA Solicitation Clauses](#).

**A. Requirement to Submit Through Grants.gov and Limited Exception Procedures.** Complete application packages must be submitted electronically through Grants.gov on or before **8:59 pm Pacific Time** (11:59 pm Eastern Time) **on August 30, 2023**. Please see the complete instructions for submitting applications via Grants.gov and the limited exception procedures in **Attachment B** to this announcement.

**B. Content of Application Submission.** Applicants must include the information outlined below in their applications. The narrative section as described below must be no longer than fifteen (**15**) **pages in total** (8 ½ x 11 inches, single spaced); pages in excess of this page limitation will not be reviewed. Applicants must also ensure that the proposal narrative provides information addressing all of the proposal evaluation criteria identified in Section V.

A. and meets the threshold eligibility criteria identified in III.C. Forms 424, 424A, maps, the detailed budget form, letters of support and forms required by Grants.gov in Attachment B **DO NOT** count toward the 15-page limit.

<b>Application Submission Content</b>	
Applicant Information on Federal Assistance Standard Form 424	Include applicant (organization) name, address, contact person, phone number, fax and e-mail address. In addition to this form, register at System for Award Management (SAM.gov), and identify your Unique Entity ID (UEI) number.
Budget Summary on Federal Assistance Standard Form 424A	Provide overall budget information on the form's tabular format including the specific amount being requested from EPA, and the total project cost.
EPA Key Contacts Form	Provide contact information as described in form.
EPA Form 4700-4	See <a href="#">Tips for Completing EPA Form 4700-4</a> for guidance on filling out this form.
Map	Provide a map of the watershed and the proposed work areas related to the project or, if more appropriate, provide a schematic that helps explain the proposed project activities.
<b>Proposal Narrative (subject to the 15-page limit) includes the following items:</b>	
<ul style="list-style-type: none"> <li>• <u>Abstract</u>- Summarize (approximately 200 words) your project's environmental significance, major activities, timeframes, and measurable outcomes.</li> <li>• <u>Water quality improvement and/or wetlands restoration</u>- Discuss the specific improvement(s) that will be achieved by the project activities and linkage to <a href="#">EPA's Strategic Plan</a>. Identify the watersheds and/or waterbodies to be addressed.</li> <li>• <u>Project activities</u>- Describe the proposed activities and highlight the plans and assessments that form the basis for the activities and expected results.</li> <li>• <u>Climate Change Resiliency</u>- Describe, where applicable, how risks associated with climate change and planned resiliency are factored into the proposed activities such as addressing sea level rise, changes in rainfall patterns, fires and other known stressors.</li> <li>• <u>Timeframe</u>- Identify the timeframe for activities and environmental results. If planning and assessment activities are proposed, describe the likelihood of implementation, including key next steps, funding, and timeframe for environmental results.</li> <li>• <u>CCMP</u>- Provide the list of relevant CCMP objectives and actions to be implemented by the project. A list of the CCMP objectives and actions is included as Attachment A and should be used as a basis to provide this information in the proposal narrative. For additional information on the CCMP refer to the website link in Section VIII.C.</li> <li>• <u>Outputs and Outcomes</u>- Describe the project outputs (Section I.C.3.a.) and outcomes (Section I.C.3.b.).</li> <li>• <u>Geographic Location</u>- Identify the geographic area by watershed and/or more specific location</li> </ul>	

of the project(s).

- Budget Detail- Using a table format, clearly explain how EPA funds will be used. The table should highlight key tasks/outputs for the length of the project with the associated budget breakdown. Explain how the overall project costs and the various components are cost-effective in furthering future implementation. This section also provides an opportunity for a narrative description of the budget found in the SF 424A. In the SF 424A, applicants must itemize costs related to personnel, fringe benefits, contractual costs, travel, equipment, supplies, other direct costs, indirect costs, and total costs. Description of costs in your budget detail should correspond to figures presented in the SF 424A. Budget development guidance resources are provided in Section VIII.C. *Other Information*.
- Programmatic Capability and Past Performance history- Submit a list of federally and/or non-federally funded assistance agreements (assistance agreements include Federal grants and cooperative agreements but not Federal contracts) that your organization performed within the last three years (no more than 5 agreements, and preferably EPA agreements) and describe: (i) whether, and how, you were able to successfully complete and manage those agreements; and (ii) your history of meeting the reporting requirements under those agreements including whether you adequately and timely reported on your progress towards achieving the expected outputs and outcomes of those agreements (and if not, explain why not) and whether you submitted acceptable final technical reports under the agreements; and (iii) your organizational experience and plan for timely and successfully achieving the objectives of the proposed project, and your staff expertise/qualifications, staff knowledge, and resources or the ability to obtain them, to successfully achieve the goals of the proposed project. In evaluating applicants under these factors in Section V, EPA will consider the information provided by the applicant and may also consider relevant information from other sources, including information from EPA files and from current/prior grantors (e.g., to verify and/or supplement the information provided by the applicant). If you do not have any relevant or available past performance or past reporting information, please indicate this in the application and you will receive a neutral score for these factors (a neutral score is half of the total points available in a subset of possible points). If you do not provide any response for these items, you may receive a score of 0 for these factors.
  - Organizational experience- Provide information on your organizational experience and plan for timely and successfully achieving the objectives of the proposed project.
  - Staff experience- Provide information on your staff expertise/qualifications, staff knowledge, and resources or the ability to obtain them, to successfully achieve the goals of the proposed project.
- Expenditure of Awarded Grant Funds- Provide information on the approach, procedures, and controls for ensuring that awarded grant funds will be expended in a timely and efficient manner. See Evaluation Criterion V.A.5.
- CHOOSE ONE OPTION BELOW: In your proposal, describe EITHER your project's partnership activities OR its potential benefits for underserved and/or overburdened communities. EPA will not evaluate both criteria. Applicants who mistakenly address both criteria will be contacted by EPA to determine which criteria will be used. See Evaluation Criterion V.A.6.

<p><u>Partnerships</u>- Describe your project partners and community involvement in carrying out the project. Identify partnerships that will contribute to project success and ongoing implementation beyond the grant period. Provide specifics as to each partner’s activities. Provide letters of support (which do not count towards the page limit) from partners to document their role. Describe how project partners will contribute to the project’s stated environmental outcomes. If you do not intend to use project partners in carrying out the project then demonstrate how you can effectively and efficiently perform the project without project partners.</p>	<p><u>Underserved Communities</u>- Describe the location of the project in relation to the Map (Figure 1 in Section I) in this solicitation. Provide details on the ways in which the underserved community(ies) will benefit from the project and provide letters of support (which do not count towards the page limit) from them as applicable. Describe how the project will meaningfully engage with these affected communities, especially local residents in these communities who will be affected by the project. Describe the project’s expected environmental outcomes that will make a measurable difference to an affected community experiencing adverse and disproportionate environmental harm and health risks, including an affected underserved community.</p>
---	---

**C. Contracts and Subawards.** EPA awards funds to one eligible applicant as the recipient even if other eligible entities are named as partners or co-applicants or members of a coalition or consortium. The recipient is accountable to EPA for the proper expenditure of funds.

Funding may be used to provide subawards of financial assistance, which includes using subawards to fund partnerships, provided the recipient complies with applicable requirements for subawards including those contained in [2 CFR Part 200](#) and EPA's Subaward Policy. EPA has also posted [Additional Resources on Subawards](#) for applicants to consult.

Applicants must compete contracts for services and products, including consultant contracts, and conduct cost and price analyses, to the extent required by the procurement provisions of the regulations at [2 CFR Part 200](#). Applicants are not required to identify subrecipients and/or contractors (including consultants) in their application. However, if they do, the fact that an applicant selected for award has named a specific subrecipient, contractor, or consultant in the application EPA selects for funding does not relieve the applicant of its obligations to comply with subaward and/or competitive procurement requirements as appropriate. Please note that applicants may not award sole source contracts to consulting, engineering or other firms assisting applicants with the application solely based on the firm's role in preparing the application. For additional guidance applicants should review EPA’s [Best Practice Guide for Procuring Services, Supplies, and Equipment Under EPA Assistance Agreements](#).

Successful applicants cannot use subawards to avoid requirements in EPA grant regulations for competitive procurement by using these instruments to acquire commercial services or products from for-profit organizations to carry out its assistance agreement. The nature of the transaction between the recipient and the subrecipient must be consistent with the standards for

distinguishing between vendor transactions and subrecipient assistance found at 2 CFR 200.331, the definitions of Subaward and Subrecipient at 2 CFR 200.1, and Appendix A to EPA's Subaward Policy. EPA will not be a party to these transactions. Applicants acquiring commercial goods or services must comply with the competitive procurement requirements in 2 CFR 200.319 and 2 CFR 200.320 and cannot use a subaward as the funding mechanism.

Section V. of the announcement describes the evaluation criteria and evaluation process that will be used by EPA to make selections under this announcement. During this evaluation, except for those criteria that relate to the applicant's own qualifications, past performance, and reporting history, the review panel will consider, as appropriate and relevant, the qualifications, expertise, and experience of:

- (i) an applicant's named subrecipients identified in the proposal/application if the applicant demonstrates in the proposal/application that if it receives an award that the subaward will be properly awarded consistent with the applicable regulations in 2 CFR Part 200. For example, applicants must not use subawards to obtain commercial services or products from for profit firms or individual consultants.
- (ii) an applicant's named contractor(s), including consultants, identified in the proposal/application if the applicant demonstrates in its proposal/application that the contractor(s) was selected in compliance with the competitive procurement standards in 2 CFR 200.319 and 2 CFR 200.320. For example, an applicant must demonstrate that it selected the contractor(s) competitively or that a proper non-competitive sole-source award consistent with the regulations will be made to the contractor(s), that efforts were made to provide small and disadvantaged businesses with opportunities to compete, and that some form of cost or price analysis was conducted. EPA may not accept sole source justifications for contracts for services or products that are otherwise readily available in the commercial marketplace.

EPA will not consider the qualifications, experience, and expertise of named subrecipients and/or named contractor(s) during the application evaluation process unless the applicant complies with these requirements. For additional guidance applicants should review EPA's Best Practice Guide for Procuring Services, Supplies, and Equipment Under EPA Assistance Agreements.

**D. Coalition/Partnerships.** Groups of two or more eligible applicants may choose to form a coalition and submit a single application under this RFA; however, one entity must be responsible for the grant. Coalitions must identify which eligible organization will be the recipient of the grant and which eligible organization(s) will be subrecipients of the recipient (the "pass-through entity"). Subawards must be consistent with the definition of that term in 2 CFR 200.1 and comply with EPA's Subaward Policy. The pass-through entity that administers the grant and subawards will be accountable to EPA for proper expenditure of the funds and reporting and will be the point of contact for the coalition. As provided in 2 CFR 200.332, subrecipients are accountable to the pass-through entity for proper use of EPA funding. For-profit organizations are not eligible for subawards under this grant program but may receive procurement contracts. Any contracts for services or products funded with EPA financial assistance must be awarded under the competitive procurement procedures of 2 CFR Part 200 and/or 2 CFR Part 1500, as applicable. The regulations at 2 CFR 1500.10 contain limitations on the extent to which EPA funds may

be used to compensate individual consultants. Refer to the Best Practice Guide for Procuring Services, Supplies, and Equipment Under EPA Assistance Agreements for guidance on competitive procurement requirements and consultant compensation. Do not name a procurement contractor (including a consultant) as a “partner” or otherwise in your application unless the contractor has been selected in compliance with competitive procurement requirements.

**V. Application Review Information**

**Note: Additional provisions that apply to this section can be found at [EPA Solicitation Clauses](#).**

**A. Evaluation Criteria.**

Applications will be evaluated and scored by reviewers using the criteria listed below. Each application may receive up to 100 points. Applicants should fully address these criteria as part of their submittals.

**Evaluation Criteria (100 points total)**

<b>Points (pts)</b>	<b>Evaluation Criteria</b>
<b>20</b>	<p><b>1. <u>Scope/Approach</u>:</b> Under this criterion, applications will be evaluated based on the quality and degree to which they present the key program elements discussed in Section I. including:</p> <ul style="list-style-type: none"> <li>• a technically/scientifically sound approach for addressing water quality improvement and/or wetlands restoration through the proposed activities. <b>(6 pts)</b></li> <li>• activities based on existing plans and assessments, such as watershed plans, TMDLs and/or associated analysis, or stormwater/green infrastructure plans; or for proposed planning and assessment activities, the likelihood of subsequent implementation. <b>(6 pts)</b></li> <li>• a description of the environmental and regional significance of the project, its contribution to climate change science, planning and local or regional resiliency, and the relative risk and reward of pursuing the project or approach. <b>(8 pts)</b></li> </ul>

25	<p><b>2. Environmental Results—Outputs and Outcomes:</b> Under this criterion, applications will be evaluated based on how well they demonstrate:</p> <ul style="list-style-type: none"> <li>• well defined outputs throughout the project timeframe. <b>(5 pts)</b></li> <li>• clearly described water quality and/or wetlands results that are specific, quantified and significant and link to EPA’s Strategic Plan. <b>(15 pts)</b></li> <li>• an effective plan for tracking and measuring progress toward achieving expected project outputs and outcomes, including those identified in Section I.C.3.a. and Section I.C.3.b.* <b>(5 pts)</b></li> </ul> <p><i>* EPA will consider the quality and scope of the monitoring component to measure environmental results under this criterion. If monitoring is not an appropriate project activity necessary to achieve and document results, proposals will not receive a lower rating under this criterion and are eligible to receive maximum points under this criterion.</i></p>
13	<p><b>3. Budget Detail:</b> Under this criterion, applications will be evaluated based on:</p> <ul style="list-style-type: none"> <li>• the level of detailed budget information provided in a table format which should include an approximation of the cost allocated for each major activity over the project’s expected timeline. Budget resources necessary for completing a Quality Assurance Project Plan (QAPP), if applicable, sharing project information broadly, and reporting progress, are expected to be included. <b>(8 pts)</b></li> <li>• whether the overall project costs and the various components are cost-effective and reasonable in furthering future implementation of similar activities. <b>(5 pts)</b></li> </ul>
12	<p><b>4. Programmatic Capability and Past Performance:</b> Under this criterion, applications will be evaluated based on the applicant’s:</p> <ul style="list-style-type: none"> <li>• past performance in successfully completing and managing the assistance agreements identified in the proposal narrative as described in Section IV. C. of the announcement. <b>(3 pts)</b></li> <li>• history of meeting the reporting requirements under the assistance agreements identified in the proposal narrative as described in Section IV. C. of the announcement including: whether the applicant submitted acceptable final technical reports under those agreements, the extent to which the applicant adequately and timely reported on their progress towards achieving the expected outputs and outcomes under those agreements, and if such progress was not being made whether the applicant adequately reported why not. <b>(3 pts)</b></li> <li>• organizational experience and plan for timely and successfully achieving the objectives of the proposed project. <b>(3 pts)</b></li> <li>• staff expertise/qualifications, staff knowledge, and resources (or the ability to obtain them) to successfully achieve the goals of the proposed project. <b>(3 pts)</b></li> </ul> <p><i>Note: In evaluating applicants under the first two items of this criterion, EPA will consider the information provided by the applicant and may also consider relevant information from other sources including agency files and/or prior/current grantors (e.g., to verify and/or supplement the information supplied by the applicant). If you do not have any relevant or available past performance or reporting information, please indicate this in the proposal and you will receive a neutral score for these subfactors (the first two items above—a neutral score is half of the total points available in a subset of possible points). If you do not provide any response for these items, you may receive a score of 0 for these factors.</i></p>

5	<p><b>5. Expenditure of Awarded Grant Funds:</b> Under this criterion, applications will be evaluated based on their approach, procedures, and controls for ensuring that awarded grant funds will be expended in a timely and efficient manner. <b>(5 pts)</b></p>		
<p><b>6. APPLICANTS WILL BE EVALUATED UNDER EITHER 6a. Partnerships OR 6b. Underserved Communities. Applicants must address either 6a. or 6b. in their applications but not both of them.</b> Applicants should not address both criteria in their application—those that mistakenly do so will be contacted by EPA to determine which criterion will be used.</p>			
25	<p><b>6a. Partnerships</b></p> <p>Under this criterion, applications will be evaluated based on the quality and extent to which they demonstrate:</p> <ul style="list-style-type: none"> <li>diverse and unique partnerships and community involvement in the project, particularly those that contribute to expected environmental results and ongoing implementation, such as partnerships or involvement with agencies that have purview over water quality and land use decisions. Projects that do not involve partnerships will be evaluated based on how well the applicant demonstrates it can efficiently and effectively perform the project without partners and how there will be community involvement in the project to contribute to its success. <b>(15 pts)</b></li> <li>specifics as to the roles the partners will play to support the proposed project activities. Letters of support provided by partners to substantiate their role will be reviewed. Projects without partnerships will be evaluated based on how well the applicant can demonstrate how it will be able to effectively and efficiently perform the project on its own without partners. <b>(10 pts)</b></li> </ul>	25	<p><b>6b. Underserved Communities</b></p> <p>Under this criterion, applications will be evaluated based on the quality and extent to which they demonstrate:</p> <ul style="list-style-type: none"> <li>how the project benefits, in the short and long term, the affected community that has been systematically denied a full opportunity to participate in aspects of economic, social, and civic life, for example marginalization of tribes. <b>(15 pts)</b></li> <li>how the project will meaningfully engage with these affected communities, especially local residents in these communities who will be affected by the project. Letters of support provided by such partners to substantiate their role will be reviewed. <b>(10 pts)</b></li> </ul>

## **B. Review and Selection Process.**

1. Applications. Eligible applications will be evaluated by the EPA Region 9 Review Committee which will score and rank them using the evaluation criteria identified above in Section V.A. The Review Committee will consist of EPA staff and may also include representatives from other state or Federal agencies.
2. Final Selections and Awards. The Review Committee will provide rankings and funding recommendations based on the application scores to the selection official (EPA Region 9 Water Division Director.) Final funding decisions will be made by the selection official. In making the final funding decisions, the selection official will consider rank and score and may also take into account the following factors: geographic distribution of funds, diversity of projects, and availability of funds. Applicants selected for funding will be asked to submit a final application package. EPA intends to fund up to ten quality applications that will benefit underserved communities, as defined in Section I.

## **VI. Award Administration Information**

**Note: Additional provisions that apply to this section can be found at [EPA Solicitation Clauses](#).**

**A. Award Notification.** EPA anticipates notification to successful applicants will be made via electronic and/or postal mail by approximately October 11, 2023. The notification will be sent to the original signer of the application or the project contact listed in the application. This notification, which informs the applicant that its application has been selected and is being recommended for award, is not an authorization to begin work. The official notification of an award will be made by EPA's Region 9 Grants Management Office. Applicants are cautioned that only the Award Official is authorized to bind the Government to the expenditure of funds; selection does not guarantee an award will be made. For example, statutory authorization, funding or other issues discovered during the award process may affect the ability of EPA to make an award to an applicant. The award notice is the authorizing document and will be provided through electronic or postal mail. The successful applicant may need to prepare and submit additional documents and forms (e.g., work plan), which must be approved by EPA, before the grant can officially be awarded. The time between notification of selection and award of a grant can take up to 90 days.

Unsuccessful applicants will receive notification by email within 15 days of the final selections.

EPA reserves the right to negotiate and/or adjust the final grant amount and work plan content prior to award, as appropriate and consistent with Agency policy including the Assistance Agreement Competition Policy, EPA Order 5700.5A1. An approvable work plan is required to include:

1. Work plan components to be funded under the grant;
2. Estimated funding amounts for each work plan component;
3. Work plan commitments/outputs for each work plan component and a timeframe for their accomplishment;
4. Performance evaluation process and reporting schedule; and
5. Roles and responsibilities of the recipient and EPA in carrying out the work plan

commitments.

In addition, successful applicants will be required to certify that they have not been debarred or suspended from participation in federal assistance awards in accordance with 2 CFR Part 180.

**B. Administrative and National Policy Requirements.** The general award and administration process for all San Francisco Bay Water Quality Improvement Funds is governed by regulations at 2 CFR Part 200, 2 CFR Part 1500, 2 CFR Part 180, 40 CFR Part 33, applicable sections of 40 CFR Part 35 Subpart P, and other applicable EPA policies. All costs incurred under this program must be allowable under 2 CFR Part 200, Subpart E. Any recipient of funding must agree not to use assistance funds for lobbying, fundraising, or political activities (i.e., lobbying members of Congress or lobbying for other Federal grants, cooperative agreements, or contracts).

**C. Reporting Requirements.** Project monitoring and reporting requirements can be found in 2 CFR Part 200. In general, recipients are responsible for managing the day-to-day operations and activities supported by the grant or cooperative agreement to assure compliance with applicable federal requirements, and for ensuring that established milestones and performance goals are being achieved. Performance reports and financial reports must be submitted quarterly and are due 30 days after the reporting period. The content for these reports will be identified in the grant award, and will include reporting on established performance measures indicated in the project description (i.e., goals, outputs and outcomes). The final performance report is due 120 days after the assistance agreement has expired.

**D. Pre-award Costs.** In accordance with 2 CFR 1500.9, EPA award recipients may incur allowable project costs 90 calendar days before EPA makes the award. Expenses more than 90 calendar days pre-award require prior approval of EPA. All costs incurred before EPA makes the award are at the recipient's risk. EPA is under no obligation to reimburse such costs if for any reason the recipient does not receive an award or if the award is less than anticipated and inadequate to cover such costs.

**E. Compliance with other applicable laws.** Compliance with Federal laws such as the Endangered Species Act, National Historic Preservation Act, Davis-Bacon Act, etc., may be required. Applicants may also be required to comply with state laws and regulations. Applicants are not required to comply with the National Environmental Policy Act.

## **VII. Agency Contact**

For additional information, please contact:

Luisa Valiela  
EPA Region 9, Watersheds Office (WTR-3-2)  
75 Hawthorne Street  
San Francisco, CA 94105  
415-972-3400, [valiela.luisa@epa.gov](mailto:valiela.luisa@epa.gov)

## VIII. Other Information

**A. Quality Assurance and Quality Control (QA/QC).** Certain quality assurance and/or quality control (QA/QC) and peer review requirements are applicable to the collection of environmental data. Environmental data are any measurements or information that describe environmental processes, location, or condition; ecological or health effects and consequences; or the performance of environmental technology. Environmental data also include information collected directly from measurements, produced from models, and obtained from other sources such as data bases or published literature. Regulations pertaining to QA/QC requirements can be found in 2 CFR Part 200. Additional guidance can be found at: <https://www.epa.gov/quality/quality-assurance-planning-epas-pacific-southwest-region-9>.

Applicants should allow sufficient time and resources for this process in their proposed projects. If your organization does not have a Quality Management System in place, one must be developed. A project specific Quality Assurance Project Plan (QAPP) must be submitted and approved by EPA if your project includes sampling of any kind. If your proposal is selected and a QAPP required, you are encouraged to contact the EPA's QA Office at 415-972-3411 as soon as possible to discuss the process and set up a schedule for review. Allow 3-4 months in your timeline for approval of these plans.

**B. Assistance Agreement Terms and Conditions.** Recipients will be required to institute standardized reporting requirements into their work plans and include such costs in their budgets. All environmental data generated as part of the project should be comparable to the state's Surface Water Ambient Monitoring Program (SWAMP) and applicable wetlands restoration projects should be entered into the California EcoAtlas (<https://www.ecoatlas.org/>).

# Attachment A: SFEP Estuary Blueprint (CCMP) Objectives and Actions San Francisco Bay Water Quality Improvement Fund

## 2023 Request for Applications

Review this list to select which San Francisco Estuary Partnership’s Estuary Blueprint Objective(s) and Action(s) (revised in 2022, referred to as the Estuary Blueprint) will be addressed by the project’s proposed activities. Applicants must demonstrate consistency with the SFEP Estuary Blueprint by indicating the Estuary Blueprint’s objective(s) and action(s) to be implemented. Provide this information in the proposal narrative section.

<b>OBJECTIVES</b>	
<b>A</b>	Protect, restore, and enhance ecological conditions and processes that support self-sustaining natural communities
<b>B</b>	Eliminate or reduce threats to natural communities
<b>C</b>	Conduct scientific research and monitoring to measure the status of natural communities, develop and refine management actions, and track progress towards management targets
<b>D</b>	Increase resilience of tidal habitats and tributaries to climate change
<b>E</b>	Increase resilience of communities at risk from climate change impacts while promoting and protecting natural resources
<b>F</b>	Promote integrated, coordinated, multi-benefit approaches to increasing resilience
<b>G</b>	Increase drought resistance and water efficiency and reduce reliance on imported water
<b>H</b>	Improve freshwater flow patterns, quantity, and timing to better support natural resources
<b>I</b>	Reduce contaminants entering the system and improve water quality
<b>J</b>	Build public support for the protection and restoration of the Estuary
<b>K</b>	Strengthen regional leadership in support of Estuary health
<b>L</b>	Promote efficient and coordinated regional governance
<b>M</b>	Incorporate the best available social science and cultural knowledge when protecting and improving the Estuary
<b>N</b>	Engage frontline, underserved, and Indigenous communities as partners in protecting, restoring, and enhancing the Estuary

<b>ACTIONS</b>	
<b>1</b>	Plan for increased climate resiliency that incorporates natural resource protection.
<b>2</b>	Elevate frontline and Indigenous communities in planning for and benefiting from a healthy, resilient Estuary.
<b>3</b>	Overcome challenges to accelerate implementation of climate adaptation projects that prioritize natural and nature-based strategies.
<b>4</b>	Implement climate adaptation projects that prioritize natural and nature-based strategies.
<b>5</b>	Restore watershed connections to the Estuary to improve habitat, flood protection, and water quality.
<b>6</b>	Manage sediment and soil on a regional scale and advance beneficial use.

7	Decrease carbon emissions and subsidence in the Delta and increase carbon sequestration on natural and agricultural lands.
8	Implement a Wetlands Regional Monitoring Program.
9	Protect, restore, and enhance intertidal, and subtidal habitats.
10	Protect, restore, and enhance tidal marsh habitat.
11	Protect, restore, and enhance estuarine-upland transition zones and adjacent upland ecosystems.
12	Maximize habitat benefits of managed ponds and other non-tidal wetlands and waters.
13	Protect, restore, and enhance seasonal wetlands.
14	Conserve and enhance riparian and instream habitats throughout the Estuary's watersheds.
15	Minimize the impact of invasive species.
16	Improve the timing, amount, and duration of freshwater flows critical to Estuary health.
17	Reduce water use around the Estuary.
18	Expand the use of recycled water.
19	Manage stormwater with low impact development and green stormwater infrastructure.
20	Advance nutrient management in the Estuary.
21	Address emerging contaminants in the Estuary's waters.
22	Reduce human health risks due to legacy contaminants and contaminants in fish.
23	Reduce trash input into the Estuary.
24	Provide equitable public access and recreational opportunities compatible with wildlife.
25	Champion the Estuary.

**Attachment B**  
**GRANTS.GOV SUBMISSION INSTRUCTIONS**  
**San Francisco Bay Water Quality Improvement Fund**  
**2023 Request for Applications**

Updated by the Office of Grants and Debarment (June 2022)

---

a. Requirement to Submit Through Grants.gov and Limited Exception Procedures

Applicants must apply electronically through [Grants.gov](#) under this funding opportunity based on the grants.gov instructions in this announcement. If your organization has no access to the internet or access is very limited, you may request an exception for the remainder of this calendar year by following the procedures outlined [here](#). Please note that your request must be received at least 15 calendar days before the application due date to allow enough time to negotiate alternative submission methods. Issues with submissions with respect to this opportunity only are addressed in section *c. Technical Issues with Submission* below.

b. Submission Instructions

1. SAM.gov (System for Award Management) Registration Instructions

Organizations applying to this funding opportunity must have an active SAM.gov registration. If you have never done business with the Federal Government, you will need to register your organization in SAM.gov. If you do not have a SAM.gov account, then you will create an account using [login.gov](#) (1) to complete your SAM.gov registration. SAM.gov registration is FREE. The process for entity registrations includes obtaining Unique Entity ID (UEI), a 12-character alphanumeric ID assigned an entity by SAM.gov, and requires assertions, representations and certifications, and other information about your organization. Please review the [Entity Registration Checklist](#) for details on this process.

If you have done business with the Federal Government previously, you can check your entity status using your government issued UEI to determine if your registration is active. SAM.gov requires you renew your registration every 365 days to keep it active.

Please note that SAM.gov registration is different than obtaining a UEI only. Obtaining an UEI only validates your organization's legal business name and address. Please review the [Frequently Asked Question](#) on the difference for additional details.

Organizations should ensure that their SAM.gov registration includes a current e-Business (EBiz) point of contact name and email address. The EBiz point of contact is critical for Grants.gov Registration and system functionality.

Contact the [Federal Service Desk](#) for help with your SAM.gov account, to resolve technical issues or chat with a help desk agent: (866) 606-8220. The Federal Service desk hours of operation are Monday – Friday 8am – 8pm ET.

2. Grants.gov Registration Instructions

Once your SAM.gov account is active, you must register in Grants.gov. Grants.gov will electronically receive your organization information, such as e-Business (EBiz) point of contact email address and UEI. Organizations applying to this funding opportunity must have an active Grants.gov registration. Grants.gov registration is FREE. If you have never applied for a federal grant before, please review the [Grants.gov Applicant Registration](#) instructions. As part of the Grants.gov registration process, the EBiz point of contact is the only person that can affiliate and assign applicant roles to members of an organization. In addition, at least one person must be assigned as an Authorized Organization Representative (AOR). Only person(s) with the AOR role can submit applications in Grants.gov. Please review the [Intro to Grants.gov-Understanding User Roles](#) and [Learning Workspace – User Roles and Workspace Actions](#) for details on this important process.

Please note that this process can take a month or more for new registrants. Applicants must ensure that all registration requirements are met in order to apply for this opportunity through Grants.gov and should ensure that all such requirements have been met well in advance of the application submission deadline.

Contact [Grants.gov](#) for assistance at 1-800-518-4726 or [support@grants.gov](mailto:support@grants.gov) to resolve technical issues with Grants.gov. Applicants who are outside the U.S. at the time of submittal and are not able to access the toll-free number may reach a Grants.gov representative by calling 606-545-5035. The Grants.gov Support Center is available 24 hours a day 7 days a week, excluding federal holidays.

### 3. Application Submission Process

To begin the application process under this grant announcement, go to [Grants.gov](#) and click the red “Apply” button at the top of the view grant opportunity page associated with this opportunity.

The electronic submission of your application to this funding opportunity must be made by an official representative of your organization who is registered with Grants.gov and is authorized to sign applications for Federal financial assistance. If the submit button is grayed out, it may be because you do not have the appropriate role to submit in your organization. Contact your organization’s EBiz point of contact or contact [Grants.gov](#) for assistance at 1-800-518-4726 or [support@grants.gov](mailto:support@grants.gov)

Applicants need to ensure that the Authorized Organization Representative (AOR) who submits the application through Grants.gov and whose UEI is listed on the application is an AOR for the applicant listed on the application. Additionally, the UEI listed on the application must be registered to the applicant organization's SAM.gov account. If not, the application may be deemed ineligible.

### 4. Application Submission Deadline

Your organization's AOR must submit your complete application package electronically to EPA through [Grants.gov](#) no later than **August 30, 2023 11:59 PM ET**. Please allow for enough time to successfully submit your application and allow for unexpected errors that may require you to resubmit.

Applications submitted through Grants.gov will be time and date stamped electronically. Please note that successful submission of your application through Grants.gov does not necessarily mean your application is eligible for award. Any application submitted after the application deadline time and date deadline will be deemed ineligible and not be considered.

c. Technical Issues with Submission

If applicants experience technical issues during the submission of an application that they are unable to resolve, follow these procedures **before** the application deadline date:

1. Contact Grants.gov Support Center **before** the application deadline date.
2. Document the Grants.gov ticket/case number.
3. Send an email with the **Funding Opportunity Number:** EPA-R9-SFBWQIF-23-02 in the subject line to [valiela.luisa@epa.gov](mailto:valiela.luisa@epa.gov) **before** the application deadline time and date and **must** include the following:
  - a. Grants.gov ticket/case number(s)
  - b. Description of the issue
  - c. The entire application package in PDF format.Without this information, EPA may not be able to consider applications submitted outside of Grants.gov. Any application submitted after the application deadline time and date deadline will be deemed ineligible and **not** be considered.

Please note that successful submission through Grants.gov or email does not necessarily mean your application is eligible for award.

EPA will make decisions concerning acceptance of each application submitted outside of Grants.gov on a case-by-case basis. EPA will only consider accepting applications that were unable to submit through Grants.gov due to [Grants.gov](https://www.grants.gov) or relevant [SAM.gov](https://www.sam.gov) system issues or for unforeseen exigent circumstances, such as extreme weather interfering with internet access. Failure of an applicant to submit prior to the application submission deadline date because they did not properly or timely register in SAM.gov or Grants.gov is **not** an acceptable reason to justify acceptance of an application outside of Grants.gov.

d. Application Materials

**The following forms and documents are required under this announcement:**

**Mandatory Documents:**

1. Application for Federal Assistance (SF-424)
2. Budget Information for Non-Construction Programs (SF-424A)
3. EPA Key Contacts Form 5700-54
4. EPA Form 4700-4 – Preaward Compliance Review Report
5. Proposal Narrative (Project Narrative Attachment Form)-prepared as described in Section IV.B of the announcement
6. Project Area Map (submit under the “Other Attachments Form”)

**Optional/Other Documents:**

7. Other Attachments (e.g., letters of support), if applicable

Applications submitted through Grants.gov will be time and date stamped electronically. If you have not received a confirmation of receipt from EPA (not from grants.gov) within 30 days of the application deadline, please contact Luisa Valiela at (415) 972-3400. Failure to do so may result in your application not being reviewed.
