Commissioner

SEP 24 2021

Mr. Javier E. Laureano, Director
Water Division
U.S. Environmental Protection Agency, Region 2
290 Broadway, 24th Floor
New York, New York 10007-1866

Dear Mr. Laureano:

Attached please find the 28th Annual Report for the State of New Jersey's assumed Freshwater Wetlands Program. This report covers the period from July 1, 2020 through June 30, 2021.

If there are specific questions relating to the reports, please contact Jill Aspinwall of my staff at jill.aspinwall@dep.nj.gov.

Sincerely,

Vincent J. Mazzei, Jr., P.E.
Assistant Commissioner
Watershed & Land Management

CC: Marco Finocchiaro, USEPA Region 2
Jennifer Moriarty, NJDEP, Division of Land Resource Protection

State of New Jersey
Twenty Seventh Annual Report to USEPA, Region II
For a State-Assumed Freshwater Wetlands Regulatory Program
(July 1, 2020 - June 30, 2021)

The State of New Jersey, Department of Environmental Protection (Department) hereby submits this 28th annual report pursuant to the program reporting requirements of 40 CFR 233.52, and the State of New Jersey's Memorandum of Agreement (MOA), 40 CFR Part 233.13, with the Regional Administrator of the U.S. Environmental Protection Agency (USEPA), Region II. Please note that this report covers the time period from July 1, 2020 through the end of the State fiscal year, June 30, 2021, as required by the MOA.

DATA SUMMARY

Attached (**Appendix 1**) please find a database printout listing the pertinent regulatory program decisions rendered by the Department during the referenced review period. The data follows the same format as that provided in last year's report. This report provides data for applications that were decided within the reporting period.

As you recall, the Department's database tracks wetlands impacts in several categories, including "Wetlands filled (acres), Wetlands Excavated (acres), and Wetlands Cleared (acres)." Since the Federal Government only regulates wetland fill, the tables below only summarize acres of wetland filled, not acres cleared or excavated, however **Appendix 1** includes all three types of impacts. The database also provides the categories "Emergency permits, GPs and IPs; IP modification; and Open Water Fill." Finally, please note that general permit 10 is divided into two options; 10A and 10B. Table 1 below combines these options for reporting purposes, but the printout shows the separate categories for your information.

Table 1

General Permit Designation	Description of General Permit
10A-Very Minor Road Crossing	100 foot crossing & ¼ acre impact OR 1/8 acre and no length limit
10B-Minor Road Crossing	No alternative with lesser impact & ¼ acre impact

The Department completed processing of a total of 195 permit applications and made decisions as shown in the following chart.

Status of Permits from July 1, 2020 – June 30, 2021

	IPs & IP Mods	GPs & Mods	SOW Fill	Emergency Permits		
				GPs	IPs	Total
# Decisions	13	181	1	0	0	195
# Permits Approved	13	181	1	0	0	195
# Permits Denied	0	0	0	0	0	0
# Applications Withdrawn/ Cancelled	0	0	0	0	0	0

The following table contains an evaluation of the permit issuance data and the cumulative freshwater wetland fills resulting from the 195 freshwater wetland permits approved by the Department. The database printout is included as **Appendix 1**.

ACREAGE OF WETLANDS FILLED RESULTING FROM PERMIT ISSUANCE BY DEPARTMENT

July 1, 2020 -- June 30, 2021

Permit Type	# Permits Authorized	Acres Filled	Mitigation Required
GP#1	12	0.00	Not required
GP#2	24	0.149	Required for permanent impacts to 0.1 acres or greater. One permit required mitigation and the mitigation was unknow at permit issuance
GP#3	1	0.00	Not required
GP#4	3	0.00	Required. Temporary impacts- are restored. No projects required mitigation
GP #5	2	0.993	Required except for wetlands that formed on top of landfill.

GP#6	21	4.414	Required for impacts to waters of the U.S. only. One permit required mitigation in the form of credit purchase.
GP#7	9	0.708	Not required
GP#8	9	0.00	Not required
GP#9	2	0.00	Not required
GP#10	25	0.528	Required for permanent impacts to 0.1 acres or greater. Two Permits required mitigation:
GP#11	17	0.298	Required for permanent impacts to 0.1 acres or greater. One Permit required mitigation. Mitigation was unknown at time of permit issuance
GP#12	7	0.00	Not required
GP#13	2	0.00	Not required
GP#14	4	0.01	Not required
GP#15	1	0.00	Not required
GP#16	3	0.00	Not required. GP#16 authorizes the enhancement of wetlands and/or habitat
GP#17	11	0.708	Not required
GP#18	4	0.34	Not required
GP#19	0	0.00	Not required

GP#20	7	0.0027	Not required
GP#21	1	0.00	Required for permanent impacts to 0.1 acres or greater. No permits required mitigation
GP#22	0	0.00	Not required
GP#23	0	0.00	Not required
GP#24	5	0.002	Not required
GP#25	0	0.00	Not required
GP#26	0	0.00	Not required
GP#27	0	0.00	Not required

Totals	# Authorized	Acres Filled	Mitigation Required
Cumulative General Permits	170	8.1527	See Table above
General Permit Modifications	11	0.043	Not required
Emergency General Permits	0	0.00	Not required
Individual Wetland Permits	12	4.996	Required
Individual Wetland Permit Modifications	1	0.00	Required if modification authorizes additional wetland impacts.
Individual Open Water Fill Permits	1	0.00	Required
Emergency Individual Permits	0	0.00	Required
Individual Permit Extensions	0	0.00	Not required
Totals:	195	13.1917	

NEW JERSEY PINELANDS COMMISSION

Under a Memorandum of Agreement between the Department and the New Jersey Pinelands Commission, the Commission conducts regulatory review of activities involving discharges of dredge or fill material within the Pinelands Area. Below is the freshwater wetland permit information for July 1, 2020- June 30, 2021.

FY 2021 Pinelands Area NJ Freshwater Wetlands General Permit Activity

General Permit Type	Number of Permits Issued	Acres Impacted
10A	1	0.039
17	1	0.019
19	1	0.005
TOTAL	3	0.063

* As discussed in past reports, the New Jersey Pinelands Commission does not distinguish between “wetlands cleared”, “wetlands filled” and “wetlands excavated.” Therefore, the acres impacted include all three types of impacts.

ENFORCEMENT

The Bureau of Coastal and Land Use Compliance and Enforcement, responsible for enforcing the State's freshwater wetlands program, reports the following activity for July 1, 2020- June 30, 2021.

USEPA FWW data for FY 20: 7/1/20 – 6/30/21	Results
Incidents reported	771
Incident Investigations conducted- field Investigation	404
Virtual Investigation	561
Violation documents (NOVs) issued for Incident Investigations (includes warning letters)	82
Permit Compliance Inspections	17
Violation documents (NOVs) issued for Permit Violations	13

Notice of Administrative Order and Civil Administrative Penalty Assessment (AONOCAPA) and Notice of Civil Administrative Penalty Assessment (NOCAPAs) issued	3
ACOs and JCOs finalized	1
Settlements finalized (includes SAs and Stips)	1
Penalties Assessed (includes AONOCAPA, NOCAPA, and ACOs not associated with an AONOCAPA)	\$399,208.00
Penalties Collected	\$37,871.36

DISCUSSION OF PERMIT DATA

For those General Permits (GP) under which authorizations during the review period resulted in greater than five (5) acres of cumulative impacts, a more detailed description and discussion, is provided below. There were no general permit categories that resulted in greater than 5 acres of cumulative impacts.

MITIGATION

The Freshwater Wetlands Act and Rules allow the Department to authorize permits with standard conditions requiring an acceptable mitigation proposal before the start of regulated activities. Therefore, the Department's permitting impacts data and mitigation data do not align within any single reporting period. Some applicants delay the required submittal of a mitigation proposal until such time that they are ready to undertake their project which is why many projects do not have an approved mitigation option at the time the permit is obtained. As a result, the reviews conducted by the Mitigation Unit frequently include the review of mitigation projects intended to satisfy approved permits that may have been included in previous reports to EPA and may not include reviews of mitigation for permits contained on the current annual report. Regardless, thanks to EPA grant funding, the Department has sufficient tools to track and report on its mitigation efforts.

During the reporting period, the Department's Mitigation Unit has been involved in 113 mitigation reviews. There were 14 permits issued during this reporting period that authorized impacts greater than 1.5 acres. Eight of those were for temporary impacts associated with hazardous waste removal. The remaining 5 authorized permanent impacts. They are as follows:

File Number/County	Impact (acres)	Type of Impact	Mitigation Option
0000-10-0055.6 Essex/Morris/ Somerset	8.10	Utility line upgrades (PSE&G)	Conducting mitigation at three, offsite locations.
0000-20-0015.1 Atlantic/Burlington/ Ocean	3.64	Rebuild of utility infrastructure and generating station (Atlantic Electric)	Applicant intends to purchase credits
0300-15-0003.2 Burlington	2.25	Warehouse development	Applicant intends to purchase credits
1103-02-0019.5 Mercer	2.19	Urban renewal-cleanup and redevelopment	Onsite enhancement and preservation
1213-18-0006.1 Middlesex	1.74	Residential/Commercial Development	Onsite enhancement
1334-21-0002.1 Monmouth	1.59	Commercial development and landfill removal	Onsite enhancement
1708-08-0006.4 Gloucester	2.85	Warehouse development	Applicant intends to purchase credits for freshwater impacts

Additionally, there is a Statewide overhead utility line maintenance project underway, being conducted by PSE&G, that is disturbing many acres of wetlands (File#1710-19-0001.1 from Hunterdon and Morris Counties to Gloucester County). This permit allows impacts to 13.42 acres of wetlands, much of which is forested. The impacts mainly involve clearing of forest with some limited infrastructure improvements. The majority of the impact is not fill-related. The Department is requiring mitigation for the permanent loss of forest and that is being provided at three locations (separate watershed management areas) along the route of the clearing.

Additional Mitigation Information

During the reporting period, the Mitigation Unit completed mitigation reviews for permits resulting in the following permanent wetland impacts. Not all permits require mitigation as the rules allow for some minor disturbance under certain General Permit authorizations. Therefore, these impacts will not align with the impacts reported elsewhere for current permitting.

PERMIT IMPACTS in 2020 reporting period (for projects which require mitigation)

	Palustrine Emergent (ac)	Palustrine Scrub/Shrub(ac)	Palustrine Forested (ac)	State Open Water (ac)	Total (ac)
Excavated	2.20	0	1.38	0.32	3.90
Filled	16.81	2.83	8.22	1.30	29.16
Temporary*	12.95	5.01	7.47	7.32	32.75
Total	31.96	7.84	17.07	8.94	65.81

*Temporary impacts require a complete restoration plan and five-year monitoring, like all mitigation projects.

It is important to note that while the impacts have been recorded in the table above for all projects reviewed, if there was no plan included with the permit application, the applicant received a conditional approval requiring the applicant to provide a mitigation proposal. Therefore, there are no mitigation numbers to report until such time that a plan is received and approved.

The following summary tracks only mitigation for which plans have been approved and which are in various stages of completion. The “amount required” is the same as the impact number. The amount proposed reflects the application of a ratio. For example, if an applicant proposes to do a restoration mitigation, then the amount proposed reflects the Department’s requirement to provide two acres for each one acre of impact; for enhancement anywhere from 3 to 10 times the area of impact; and for preservation, the amount required would reflect the Department’s requirement to provide 27 acres for each acre of impact. The data for this time period is as follows:

APPROVED MITIGATION in 2020 reporting period

Type of Wetlands to be Mitigated	Amount required (acres)	Amount Proposed (acres)	Amount Completed (acres)
Palustrine Emergent	16.94	25.94	0.04
Palustrine Forested	18.16	26.68	0.2
Palustrine Scrub Shrub	1.16	1.23	0.02
State Open Waters	6.80	6.38*	0.03

Totals	43.06	60.23	0.29
--------	-------	-------	------

*NOTE: One applicant chose to provide additional wetlands instead of Open water.

Finally, like last year, the Department is providing one additional table which will become part of our regular monitoring report. The following table shows the projects that were completed in their entirety and closed out during the reporting period.

MITIGATION COMPLETED in 2020 reporting period

Type of Wetlands that were Mitigated	Amount required (acres)	Amount Completed (acres)	Amount Pending (acres)
Palustrine Emergent	1.556	1.593	0
Palustrine Forested	4.264	7.166	0
Palustrine Scrub Shrub	0.021	0.021	0
State Open Waters	0.276	0.243	0.033*
Totals	129.1	312.4	0

*File#0714-09-0004.4 (Passaic Valley Sewerage Authority) was inadvertently classified as complete when mitigation credits were purchased for permanent impacts. The Department has not yet signed off on temporary impacts that are still in the monitoring phase.

Mitigation Banks

There were no mitigation banks that received final approval during the reporting period.

In-Lieu Fee (ILF)

The Wetlands Mitigation Council administers the State's in lieu fee program. During the reporting period, the Council made the following final decisions:

1. The Council approved the proposed Buckelew Bogs Mitigation Project. The final project will enhance 9.86 acres of wetlands resulting in the establishment of 3.29 credits. The Council fully funded the project in the amount of \$669,877.93.
2. Twenty four monetary contributions were received during this reporting period.

Date received	Permit Number	WMA	Region	Impact	Amount of Contribution
7/31/2020	0501-20-0006.1	16	Atlantic	0.0003	\$3,787.20
8/27/2020	0501-09-0012.1	16	Atlantic	0.0015	\$19,873.50

9/8/2020	0501-08-0006.1	16	Atlantic	0.0004	\$1,538.47
8/27/2020	0508-09-0042.2	16	Atlantic	0.0029	\$12,997.09

5/20/2021	0510-21-0007.1	16	Atlantic	0.0009	\$11,351.90
6/16/2021	0501-03-0042.1	16	Atlantic	0.00075	\$7,753.98
6/16/2021	0501-05-0049.1	16	Atlantic	0.0013	\$16,420.87
6/24/2021	0501-21-0003.1	16	Atlantic	0.002	\$29,939.22

OTHER INITIATIVES

The wetland impacts the Division authorizes only account for a fraction of the wetlands on a particular property. Likewise, many of our permits result in conservation restrictions that preserve wetlands in perpetuity. The Department's data base (NJEMS) has been modified to track these positive changes. Wetlands left undisturbed and/or preserved have also been identified as a performance metric for the Division. For this reporting period the Department provides the following information:

Freshwater Wetlands **preserved permanently** = 599.746 acres. These sites have conservation restrictions associated with approvals such as transition area averaging plans that include wetlands; and

Freshwater Wetlands **undisturbed** = 908.255 acres (wetlands that are unaffected on development sites for which we have approved permits).

Data

The Department is providing the following data reports upon which the mitigation provisions of this report were based:

1. A printout of all mitigation projects receiving either preliminary or final sign off during the reporting period. "Mit Report Complete Supervisor Review by Impacts" contains all projects that were reviewed during the reporting period and that either received conditions requiring the submittal of a mitigation proposal (the PENDING projects) **and** projects for which a mitigation plan has been approved (the APPROVED projects);

2. "All Approve Mitigation Plan" is a different report than was provided in previous years. It still encompasses projects for which a mitigation proposal has been provided and approved and which are now being tracked via the submittal of monitoring reports. "All" includes all mitigation. Freshwater wetlands is on pages 4-13 and State open waters are on pages 29-32 of this overall mitigation report;

The key to the "Mit Report Complete Supervisor Review by Impacts" is as follows:

"File number" is file number;

"Facility Name" is applicant name;

"Amount required" equates to the impact;

"Amount proposed" is the amount the applicant proposes to create, enhance, etc. in an approved mitigation plan and reflects the ratios that have been applied to the amount required;

"Amount completed" is the amount that has been field verified when the project has completed the 5-year (or longer) monitoring period;

"Mitigation Information Method" is the method of mitigation that is being provided, for example, creation restoration, or enhancement. Note the Department uses "Temporary" to designate impacts to be restored in kind and in place, for example after hazardous wastes are removed, and to distinguish these impacts from "Restoration" which is a defined mitigation method.

"Name of Bank" is the name of a bank in the service area that is used to satisfy the mitigation requirement.

3. "Mitigation Completed" projects are those for which all requirements have been met, the project is complete in its entirety and the file has been closed; and

4. A list of State and Federal/State combined mitigation banks with freshwater wetland credits.

All mitigation documentation is included as **Appendix 2**.

COORDINATION WITH OTHER AGENCIES

As required pursuant to the assumption agreement, the Department coordinates with the New Jersey Historic Preservation Office (an agency located within the New Jersey Department of Environmental Protection), the U.S. Fish and Wildlife Service, and EPA.

State Historic Preservation Office

In accordance with the Memorandum of Understanding, the Department screens incoming applications for categories of activities that "may affect properties which are listed, or are eligible for listing, on the New Jersey or National Register of Historic Places" (See N.J.A.C. 7:7A-12.2(l)). However, in the October 2008 amendments to the Freshwater Wetlands Protection Act rules, applicants are required to do a preliminary assessment of their projects and those proposing projects having a high probability of the presence of historic and archaeological resources, in accordance with the Department's criteria are required to submit a Phase IA historical and archaeological survey and an architectural survey with their initial application to the Department. This enables the Department to forward the application with the initial survey to SHPO for review and comment. A permit cannot be issued "unless the applicant demonstrates to the Department that the proposed activity avoids or minimizes impacts to the maximum extent practicable or the Department determines that any impact to the affected property would not impact the property's ability to continue to meet the criteria for listing ...or otherwise negatively impact the integrity of the property or the characteristics of the property that led to the determination of listing or eligibility." (See N.J.A.C. 7:7A-4.3(b)5) The State Historic Preservation Office completed a total of 359 reviews. See **Appendix 4** for a summary of these reviews.

Endangered Species Issues

The Department's review of permit applications under the Freshwater Wetlands Protection Act includes a review for potential impacts to both Federal and State-listed threatened and endangered species; 1262 projects were reviewed, and 60 field inspections were conducted (COVID-19 impacted). As a result of these reviews, 229 sites were classified as wetlands of exceptional resource value* due to the presence of State or Federally listed species or associated habitat. Of the 229 exceptional resource value classifications, 88 classifications were related to Federally-listed species (sturgeon and SBA are not included into exceptional resource value classifications). Specifically, the following classifications were made:

- 4 sites for bog turtle (*Clemmys muhlenbergii*)
- 8 sites for Swamp pink (*Helonias bullata*)
- 43 sites for Indiana bat (*Myotis sodalis*)
- 28 sites for Northern Long-eared Bat (*Myotis septentrionalis*)
- 3 sites for Piping plover (*Charadrius melodus*)
- 2 sites for Red Knot (*Calidris canutus*)
- 8 sites for Shortnose Sturgeon (*Acipenser brevirostrum*)
- 9 sites for Atlantic Sturgeon (*Acipenser oxyrinchus oxyrinchus*)
- 5 sites for Sea Beach Amaranth

*Designation of wetlands as exceptional resource value under the State program reflects the highest classification and affords such resources the greatest degree of protection under the Freshwater Wetlands Protection Act. Similarly, certain limitations and restrictions apply within and around such wetlands, and specific types of proposed activities -- which might otherwise qualify for authorization under applicable general permits -- cannot be authorized if proposed within wetlands of exceptional resource value or their associated transition area.

U.S. Fish and Wildlife Service

As required pursuant to the Department's Memorandum of Understanding with the U.S. Fish and Wildlife Service, upon receipt, those applications for certain general permits in municipalities that have Federally-listed endangered or threatened species are sent to the U.S. Fish and Wildlife Service for review. The Service makes a finding of "no potential to affect" or "potential to affect" endangered or threatened species. For those with no potential to affect, the Department is free to complete processing of the application and approve or deny it as appropriate. For those with the potential to affect endangered or threatened species, as determined by the U.S. Fish and Wildlife Service, the Department works with the Service to satisfy their concerns by either working with the applicant to amend a project, attaching conditions to a permit, denying a permit or elevating the Service's concerns to USEPA for consideration and resolution.

Since the Service began experiencing severe staffing reductions that made it more difficult for them to fulfill their mandate, the Department agreed to modify its coordination process with the Service by undertaking pre-screening of applications with the goal of narrowing the number of projects circulated to the Service to those with species onsite or within a specific vicinity. Accordingly, the Department reviewed a total of 263 projects for potential impacts to Federally listed threatened or endangered species. Of these, 125 projects were determined to have no potential to impact Federally-listed species. However, 130 projects were deemed by the Department to have a potential to affect Federally-listed species and were therefore forwarded to the Service for review. The database printouts in **Appendix 3** show the results of the Service coordination on those applications that were completed during this timeframe.

Status of wetland permitting in the Highlands Preservation Area

The Highlands Water Protection and Planning Act (Highlands Act) (N.J.S.A. 13:20-1 et seq.) establishes more stringent permitting for a region in the northern portion of the State. As stated in our last report, the Highlands Act has modified the administration of the State's wetland program in the Preservation area of the Highlands region by making it more difficult to obtain permits for impacts to Highlands open waters, which include wetlands. The Highlands Act prohibits all but linear impacts to Highlands open waters. Further, by regulation, all wetland impacts in the Highlands preservation area require mitigation.

The Department issued Highlands Preservation Area Approvals for a total of four projects. There were 3 General Permit 1 for Habitat Creation and Enhancement and one Highlands Preservation Area Approval. There were no wetlands filled in the Highlands Preservation Area that were associated with the approvals during the reporting period. Data from permitting that occurred in the Highlands preservation area under the Highlands Act is presented in **Appendix 5**.

OTHER SIGNIFICANT ISSUES

In January 2020, New Jersey embarked on a targeted regulatory reform effort that will modernize environmental laws to Protect Against Climate Threats (PACT). NJ PACT will usher critically needed changes to our air emissions and environmental land use regulations, to enable government, businesses, and residents to effectively respond to current climate threats, and reduce

future climate damages. NJ PACT charts a course of immediate and comprehensive action, taking steps that both: (1) cut emissions of greenhouse gases and short-lived climate pollutants; and, (2) tailor land use and planning policies to adapt to unavoidable impacts, such as sea-level rise, extreme weather, and chronic flooding. These reforms represent a PACT with the residents of New Jersey to help them adapt to the reality of climate change in a manner that protects property, infrastructure and quality of life, while supporting new economic development and smart growth. The Department is drafting regulatory changes.
